Baker Tilly US, LLP, trading as Baker Tilly, is an independent member of Baker Tilly International. Baker Tilly International Limited is an English company. Baker Tilly International provides no professional services to clients. Each member firm is a separate and independent legal entity, and each describes itself as such. Baker Tilly US, LLP is not Baker Tilly International's agent and does not have the authority to bind Baker Tilly International or act on Baker Tilly International's behalf. None of Baker Tilly International, Baker Tilly US, LLP nor any of the other member firms of Baker Tilly International has any liability for each other's acts or omissions. The name Baker Tilly and its associated logo is used under license from Baker Tilly International Limited.

Introduction

Overview

Background

The <u>California Government Code Section 1236</u> requires all cities that conduct audit activities to conduct their work under the general and specified standards prescribed by the Institute of Internal Auditors (IIA) or the Government Auditing Standards (GAO) issued by the Comptroller General of the United States, as appropriate. The internal audit function will govern itself by adherence to the mandatory elements of the International Standards for the Professional Practice of Internal Auditing (the Standards). According to the IIA Standard 2010, the head of internal audit function "must establish a risk-based plan to determine the priorities of the internal audit activity, consistent with the organization's goals" and consider the input from senior management and a governing board.

The City Auditor's Office (CAO) engaged Baker Tilly US, LLP (Baker Tilly) in 2022 to conduct a citywide risk assessment and prepare an annual audit work plan for five years. The purpose of the internal audit function's risk assessment is to develop an audit plan that assigns internal audit resources to the activities that add the most value to the City of Santa Clara (the City). The risk assessment process involves identifying and measuring risks associated with the <u>audit universe</u> (a list of specific departments, functions, processes, programs, etc. that can be subject to an audit, i.e. auditable units). Risk is defined as "the possibility of an event or condition occurring that will have an impact on the ability of an organization to achieve its objectives."¹

Audit Planning

This report summarizes Baker Tilly's risk assessment methodology, analysis, and results. The 2023–2024 audit plan proposed in this report is based on the results of this risk assessment. The risk assessment involved collaboration with City Council and executive management from 14 main departments across the organization.

In conducting the 2022 risk assessment, we performed the following:

- Developed an understanding of the City's environment, businesses, and objectives
- Met with members of City Council and the Executive Management Team representing the major operations and administrative functions of the City
- Reviewed key documentation such as the City Council Priority Matrix, the annual budget documents, financial statements, departmental strategic plans, and prior audit reports
- Evaluated the results of interviews and documentation reviews and considered industry factors to identify areas of risk to the City

In developing the 2023–2024 Audit Plan, we considered the following:

- Risk assessment Internal audit activities to target high and moderate risk areas based on the results of the risk assessment
- Adding value Internal audit activities to add value through independent and objective analysis
- City Council The CAO reports to the City Council and seeks input on audit priorities
- Coverage and other audits Consideration of prior and other audits as well as pervasiveness of the process or control to ensure audit coverage and to avoid duplication of efforts
- Scheduling Consideration of the timing of an audit and other on-going initiatives in order to avoid putting an undue burden on City staff that may exacerbate the risk at hand or other interrelated risks

¹ Rick A, Wright Jr., CIA, "The Internal Auditor's Guide to Risk Assessment" The Institute of Internal Auditors Research Foundation (IIARF), 2018

Organizational Strengths

Through the risk assessment, we observed certain strengths of the City. Key strengths include:

- Dedication to the citizens and business community
- High value on financial stability and public safety
- Focus on excellence and affordability
- Highly professional and dedicated management and staff

Risk Assessment Process Considerations

The starting point of the internal auditing is to conduct a risk assessment that is the basis for determining the internal audit activities. However, it is not a one-size-fits-all process. The scope and complexity of risk assessment are affected by various factors such as the maturity level of the internal audit function's products and services, the organization's enterprise risk management (ERM) efforts, coordination with other monitoring and risk management functions, and the stakeholders' expectations. The best practice is to focus on risks related to the achievement of the organization's strategies and objectives. The internal audit risk assessment needs to be conducted at least annually, and internal auditors should monitor the environment for changes and emerging risks.

In addition to the annual macro-level risk assessment, the internal audit function is required to perform an engagement-level risk assessment when starting each audit listed in the approved audit plan. The IIA Standard 2200 states, "Internal auditors must develop and document a plan for each engagement, including the engagement's objectives, scope, timing, and resource allocations. The plan must consider the organization's strategies, objectives, and risks relevant to the engagement."

Risk assessment can also be conducted as part of risk management as one of the essential elements of organizational governance. ERM is defined as "the culture, capabilities, and practices, integrated with strategysetting and performance, that organizations rely on to manage risk in creating, preserving, and realizing value."² ERM is more than having a list of all the risks for an organization. The COSO's ERM principles covering governance to monitoring (including defining risk appetite and implementing risk responses), apply to all levels and functions of an organization although management has overall responsibility for managing risks and a governing body has an oversight role. The internal audit function may leverage ERM information, if available, for efficiency and quality of its risk assessment.

² "<u>COSO Enterprise Risk Management-Integrating with Strategy and Performance</u>", The Committee of Sponsoring Organizations of the Treadway Commission (COSO), 2017

Risk Assessment Approach

Baker Tilly's risk assessment approach consisted of four phases as illustrated in the graphic below.

	2022 RISK ASSESSMENT PHASES
Dianning	Worked with the CAO to determine the appropriate approach to plan and perform the risk assessment
Planning	 Scheduled the interviews with City Council members and Executive Management Team (EMT) members
	• Reviewed the key documents such as Council Priority Matrix, the biennial budget documents, the annual comprehensive financial report, departmental strategic plans, audit reports, the information on the City's website and other relevant documents.
Information Gathering	 Interviewed over 30 individuals to identify the events and conditions that may affect the achievement of objectives
	 Distributed a questionnaire to the EMT members- to gather additional information on each auditable unit
	• Obtained and considered the financial data, budget data, employee turnover data, application inventory, and claims information
	 Scored the auditable units in the risk matrix based on the likelihood and the impact³ of potential adverse events
Analysis	 Each of the auditable units received scores for various risk factors related to the likelihood or impact (defined in <u>Appendix A</u>)
	• Risk factor scores were summed to create a single score for the auditable unit
	Identified potential internal audit activities for the auditable units with high risk scores
Reporting	Summarized the approach and results of the risk assessment

Baker Tilly conducted the first risk assessment by interviewing all City Council members and EMT members and reviewing the key documents and data. Our risk assessment process primarily measured inherent risk (the risk before mitigating controls/factors are applied) in the City's current environment.

The next risk assessment will include an update to this risk assessment in accordance with the contract. For the second-year risk assessment, Baker Tilly will interview the EMT members and also conduct a risk assessment survey to obtain input from other members of management. For the third and fifth year, the existing audit plan will be evaluated based on interviews with City audit staff and amended if necessary. For the fourth year, a full risk assessment and a survey will be conducted.

³ Likelihood is the possibility that an event will occur. Impact is the extent to which an event might affect an organization.

Risk Assessment Results

Citywide Key Risk Areas

Baker Tilly performed interviews with members of City Council and the Executive Management Team. During these interviews, Baker Tilly asked them to describe the areas they view to be the top five risks facing the City overall, regardless as to whether it is specific to their area of focus/department or not. The following is a list of risk themes identified in those interviews:

- Strategic Workforce Planning
- Budget and Financial Performance
- Compliance and Legal Risks
- Organizational Governance
- Information Technology & Cybersecurity

Strategic Workforce Planning

- Employee Recruitment & Retention Attracting and retaining high-performing employees is a complex challenge facing the City. Recent legislation such as the Public Employee Pension Reform Act of 2013 (PEPRA) made public employment less attractive in the State of California as retirement benefits became less generous. In addition, the City's high cost of living limits the applicant pool as many employees and prospective employees commute long distances to work for the City.
- Employee Turnover The City faces potential risk of employee turnover in a variety of critical positions due to retirement eligibility, perceived or actual lack of upward mobility, and competitiveness of compensation and benefits in comparison to the cost of living. Employee turnover for any reason creates gaps in institutional knowledge. Succession planning, documenting standard operating procedures and cross training are key considerations for entities facing this dynamic.

Financial

- Revenue Generation Although the City has many sources of revenue, some of which are healthy and stable, the City also relies on economically sensitive revenues such as sales tax and transient occupancy tax. The City has been a hub for the world's top technology firms and owns Levi's Stadium and Convention Center, which bring in visitors to hotels, restaurants, and retail. These visitors and daytime population help feed the sales and transient occupancy taxes. The COVID-19 pandemic has highlighted weaknesses in the reliability of this revenue structure.
- Funding The City faces difficult budget reductions necessary to bring the budget into balance. As a
 result, some essential accounts, programs, and capital projects remain unfunded.

Compliance/Legal

- Compliance with Laws, Regulations, and Contracts The City has a complex regulatory compliance environment, in which the City must comply with numerous laws and regulations, local ordinances, contracts and grant agreements, and policies and procedures. Failure to track and update relevant laws and regulations may lead to external audit findings, fines, reputational harm and other negative outcomes.
- Litigation The City has been involved in multiple lawsuits and settlements in recent years.

Governance

Leadership – Effective local government governing body and officers must think and act strategically
and collaborate with a network of community entities and institutions at the national, state, and local
level. Operating in an environment where there are numerous stakeholders and key partners can strain
the governance system and impair the ability to meet citizens' needs and organizational objectives.

Information Technology

 Cybersecurity – Ransomware and malware attacks are growing threats facing all municipal governments. These cyberattacks may result in significant financial losses, costly service disruption, and loss of information. The City faces similar threats on a daily basis and seeks to ensure that its information security practices and controls mitigate these risks.

Department Descriptions and Key Risk Areas

When identifying risks for the City, Baker Tilly considered each department and associated risks. The concerns listed by the interviewees included limited staffing and succession planning, specific accounts or programs with limited or no funding, aged infrastructure, lawsuits, and drought. Based on these concerns, departments' functions, and their inherent risks, Baker Tilly identified the auditable risk areas for each department. Below is an overview of the City's departments and their key risk areas.

City Attorney's Office

The City Attorney's Office provides hearing and trial counsel services and other legal advisory services such as review/negotiation of contracts, preparation of resolutions and ordinances, attendance to all meetings of the City Council, and response to legal inquiries.

City Clerk's Office

The Elected City Clerk administers City elections. The Assistant City Clerk is responsible for various day-to-day operations, including attending and maintaining records of City Council and public meetings; complying with Records Retention Schedule; responding to Public Records Act requests, and administering campaign and disclosure laws.

City Manager's Office

The City Manager's Office supports the City Council with policy decision making, provides direction and support to all City departments, and is responsible for strategic planning, citywide emergency preparedness, economic development, community outreach and engagement, property management, special projects, and implementation of Council direction. It also provides general administration for citywide programs, citywide strategic programs and initiatives (such as sustainability), convention center, and stadium operations.

Community Development Department

The Community Development Department's primary objectives are maintenance of the General Plan, proactive land use planning to meet the future needs of the community, delivery of professional services such as development review and permitting and inspection services, and administration of programs related to affordable housing.

Electronic Utility Department

The Electric Utility Department (Silicon Valley Power, or SVP) owns power generation facilities, has investments in joint ventures that produce electric power, and trades power on the

Key Risk Areas

- Case management
- Conflict of interest monitoring

Key Risk Areas

- Public Records Act compliance
- Records retention program

Key Risk Areas

- Property management
- Convention center operation
- Stadium operation
- Business continuity plan for the City departments

Key Risk Areas

- Building permitting & inspection
- Housing inspection
- Development projects review
- Code enforcement
- Affordable housing program

Key Risk Areas

- Power Purchase Agreements
- Renewable energy programs

RISK ASSESSMENT RESULTS

open market. SVP delivers electricity to the residents and businesses and provides diverse services such as dispatch services to all City departments, outdoor Wi-Fi services, dark fiber leasing service, and energy efficiency programs.

Finance Department

The Finance Department administers the City's financial affairs. Departmental functions include budget; general accounting; financial reporting; collection of taxes, fees, special assessments, and utility charges; investment; procurement; the City Warehouse operations; and debt management.

Fire Department

The Fire Department provides fire and emergency services and organized into Administration and six divisions: Field Operations (first responders providing immediate services); Emergency Medical Services (first responder medical services); Community Risk Reduction (fire prevention activities and hazardous materials regulation by providing plan review and inspection services); Training (State and Federal certification programs); Administrative (grant management, payroll processing, budget development, etc.); Office of Emergency Services (emergency preparedness activities and disaster management plans).

Human Resources Department

The Human Resources Department is responsible for Benefits, Compensation, Recruitment, Testing, Classification, Employee and Labor Relations, Equal Employment Opportunity, Workers Compensation/Safety, and Employee development. The department also negotiates the Memorandum of Understanding agreements with bargaining units.

Information Technology Department

The Information Technology Department's IT service provider provides most IT services including enterprise computing (City data centers and network), service desk, end-user support, application management, configuration and maintenance of over 150 applications, and security services (including security incident and event management). The City IT employees are responsible for IT governance and budget.

Library Department

The Library Department has three libraries throughout the City and also provides Bookmobile service. It offers physical and digital collection of books/movies/music, technology and information access, literacy instruction, and programming such as young adults activities. The Library Department establishes

- Procurement and contract management
- Work Order and Asset Management
- Cybersecurity
- Construction project controls

Key Risk Areas

- Procurement Card Administration
- Vendor master file
- Timesheet processing
- Utility billing and collection process
- Investment management
- Warehouse/inventory management

Key Risk Areas

- Overtime
- Field inspection services
- Training
- Emergency medical services

Key Risk Areas

- Staff development and succession planning for the City departments
- Workers' Compensation and Safety
- Employee records management

Key Risk Areas

- Cybersecurity Assessment
- Managed Service Provider (MSP) contract management
- Application portfolio management
- Data management

Key Risk Areas

- Memorandum of Understanding with the Santa Clara Library Foundation & Friends
- Fee collection
- Purchasing

partnerships with community organizations to leverage resources.

Parks and Recreation Department

The Parks and Recreation Department consists of the Parks Division (planning, development, operation, maintenance and rehabilitation of City parks); the Recreation Division (classes and programs); the Cemetery Division (maintaining 33,000 interment sites), and the Senior Nutrition Program Division (a meals program). The Department offers the public with facility rentals, community services, cultural programs, and special events.

Police Department

The Police Department is broken down into four divisions. The Field Operations Division is comprised of uniformed personnel that respond to calls for service and initiate proactive contacts. The Investigations Division, which includes the Records Unit, handle follow-up investigations and bring cases forth for criminal prosecution. The Special Operations Division oversees law enforcement services for any major event within the city, including Levi's Stadium. The Administrative Services Division encompasses the department's Training Unit, School and Community Services, and 911-Comunucations Center.

Department of Public Works

The Department of Public Works is responsible for design, construction, and maintenance of the City infrastructure. The five divisions for engineering services are Administration, Traffic, Design, Land and Property Development, and Field services divisions. Operation and maintenance is provided by Facilities Services, Streets, and Feet Management divisions.

Water and Sewer Utilities Department

The Water and Sewer Utilities Department provides planning, design, construction, maintenance, and operation of the City's water distribution system, sewer collection system, and recycled water system. The City jointly owns the San Jose-Santa Clara Regional Wastewater Facility.

Key Risk Areas

- Park infrastructure
- Park revenue

Key Risk Areas

- Overtime
- Body-worn camera
- Use of force policies
- Evidence processing and storage
- Case management

Key Risk Areas

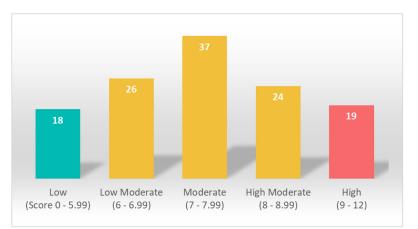

- Construction project controls
- The Americans with Disabilities Act (ADA) compliance
- Maintenance service requests
- Grant management

Key Risk Areas

- Construction project controls
- Water conservation and sustainability programs
- Rate setting practices
- Work order and asset management

Overall Risk Scoring Distribution

Baker Tilly structured the audit universe based on the department/division/program from the budget document and management's feedback, which resulted in 124 auditable units (<u>Appendix B</u>). We scored them based on the information gathered for each risk factor related to the likelihood, impact, or fraud. <u>Appendix A</u> lists the risk factors, definitions, and scoring method. The maximum score for an auditable unit is 12. The following chart shows the distribution of overall risk scoring.

City Department Risk Heat Map

A risk heat map is a common tool to plot risks or auditable units in order to measure their relative risks in terms of impact and likelihood. The risk heat map for the City below illustrates the City's departments based only on the highest risk division/program within each department, and therefore, it represents only 14 out of 124 auditable units. The departments toward the upper right corner of the heat map represent those with higher possibilities of greater effect. The size of a bubble indicates the fraud risk factor score.

Illustration of the departments based on the highest risk division/program within each department

Proposed 2023 - 2024 Audit Plan

Summary

The proposed audits and CAO projects for 2023 through 2024 are listed in the next page. The projects were selected from the auditable units that were rated as High or Moderate as a results of the risk assessment. The selection was made based on some factors such as risk rating, the pervasiveness of the process or control, the audit coverage, the timing of projects, and the value-adding activities that help the City enhance the ability to manage risks, strengthen accountability, and improve efficiency and effectiveness. The proposed projects include the following:

- Efficiency improvement: Building Permitting Process Review
- Capital assets: Construction Project Control Assessment; Work Order Process and Asset Management
- Compliance: Overtime Review; Power Purchase Agreement Review
- Operations: Park Operation Review
- Finance: Procurement Card Administration Review
- IT-related audits: Cybersecurity Assessment; Service Provider Contract Management
- Citywide processes: Succession Planning & Staff Development Review; Record Management and Retention
- CAO project: Risk and Control Matrix

The proposed audit plan consists of a variety of projects for a 24-month period to provide flexibility to adjust the timing of audits. It also incorporates time for an ad hoc project to address a request from the City management, if necessary. The audit plan will be updated based on the results of an annual risk assessment. However, amendments to the approved audit plan may be proposed during a year in response to changes in the City's environment such as organizational structure, operations, risks, systems, and controls.

The preliminary audit objectives are described for each audit listed. These objectives and scope of each audit activity will be further defined based on the result of an audit planning risk assessment process performed at the beginning of each activity.

Also listed in the proposed audit plan are the estimated hours to complete each audit. The budgeted hours should be determined once audit objectives and scope are finalized during the audit planning phase. The current CAO resources are two full-time employees (Internal Audit Manager and a staff member), and their total available hours would be over 3,000 hours per year. However, the CAO's capacity to execute the audit plan is very limited due to the following reasons:

- 1. The staff member will not be available to execute the internal audit activities due to the responsibility to "audit and approve all bills, invoices, payrolls, demands or charges against the City government before payment", which is required by the Santa Clara City Code Sec. 909 City Auditor⁴.
- 2. The approval before payment is a control activity in the operational/transactional process. According to Standard 1130 of the IIA Standards⁵, it would be an impairment to organizational independence and individual objectivity if the staff member performs an audit of the processes related to her approvals.
- 3. The Internal Audit Manager who supervises the internal audit staff also performs the same tasks whenever the staff member cannot perform the approval and other related duties.

It is recommended that the City evaluate the current roles and responsibilities of the CAO and take the appropriate action(s) to ensure that the CAO will achieve its mission and help the City improve the effectiveness of risk management, control, and governance processes.

⁴ The Charter of the City of Santa Clara Article IX Officers and Employees, Sec. 909 City Auditor (<u>CHARTER OF THE CITY OF SANTA CLARA</u> (<u>codepublishing.com</u>)

⁵ Standard 1130.A1 states. "Internal auditors must refrain from assessing specific operations for which they were previously responsible. Objectivity is presumed to be impaired if an internal auditor provides assurance services for an activity for which the internal auditor had responsibility within the previous year."

Proposed Audit Plan for 2023 and 2024

Department	Project Title	Preliminary Audit Objectives	Estimated Hours
Electric Utility Department	Cybersecurity assessment	 Map current state security capabilities to the NIST Cybersecurity Framework and/or other industry specific frameworks and evaluate the maturity of current security processes Identify current risks related to weaknesses in the City's cybersecurity program 	650
Information Technology Department		Identify target state objectives utilizing the Capability Maturity Model (CMMI) and develop recommendation to meet the objectives	
Finance Department	Procurement card administration	 Determine whether procurement cards are administered to ensure that only the authorized users can make purchases in accordance with the requirements and guidelines. Determine whether internal controls over procurement card transactions are in place and working effectively to prevent and detect errors and irregularities, including duplicate, unauthorized, or improper transactions. 	330
Community Development Department	Building permitting process	Assess the efficiency and effectiveness of the building permitting process	360
Library Department	Memorandum of Understanding (MOU) with the Santa Clara Library Foundation & Friends	Determine whether the internal controls to monitor the compliance with the MOU requirements are in place and working effectively	240
Department of Public Works	Construction project control assessment	Determine whether internal controls over construction projects are adequate and working effectively	300
CAO project / Citywide	Risk and control matrix	Create a risk and control matrix for each department to be utilized for future discussion and review of the City's control environment	840
TBD	Ad Hoc Requests	TBD	200
	•	Sub Total - 2023	2,920
Information Technology Department	Managed Service Provider (MSP) contract management	Determine whether the City proactively manages its cybersecurity risk and collaborates with its MSP to jointly reduce the risk by defining roles/responsibilities and expectations such as security controls and incident response plans and by monitoring of MSP's access and activities.	400
Police Department Fire Department	Public safety personnel overtime	 Determine whether adequate policies and procedures are in place to ensure the appropriate usage of overtime for the public safety personel. Determine whether the overtime practice and reporting comply with the City's policies and procedures. 	300
Electric Utility Department	Power purchase agreements	 Assess the process for evaluating and entering into power purchase agreements. Assess the effectiveness of the internal controls in overseeing the power purchase agreements 	370
Parks & Recreation Department	Park operation	 Determine whether the internal controls over the maintenance of parks are working effectively. Determine whether the internal controls over fee collection are working effectively. 	380
City Manager's Office	Property management	Evaluate the efficiency and effectiveness of the City's property management	240
Water and Sewer Utilities Department	Work order process and asset management	Determine whether the internal controls over the work order process are adequate and working effectively.	420
City Clerk's Office	Record management and retention program	 Determine whether citywide record management and retention policies and procedures are properly established in accordance with laws and regulations Determine whether internal controls are working effectively to ensure compliance with the record management and retention policies and procedures 	300
Human Resources / Citywide	Citywide succession planning and staff development	 Determine whether adequate policies and procedures are in place to development and maintain succession plans to ensure continuity in key positions for all departments Determine whether coaching and development programs are in place to ensure that the successors are prepared to assume positions when necessary 	300
TBD	Ad Hoc Requests	ТВД	200
		Sub Total - 2024	2,910
		TOTAL - 2023 & 2024	5,830

Appendices
