

FY 2021/22 Budget Amendments

Electric Utility Fund (091)

Item	Source of Funds	Use of Funds	Explanation
Charges for Services	12,024,047		This action recognizes additional revenue from Charges for Services to help offset the higher expenditure costs (five affirmative Council votes required to appropriate additional revenue) .
Wholesale Revenue	6,375,029		This action recognizes additional revenue from Wholesale Revenue to help offset the higher expenditure costs (five affirmative Council votes required to appropriate additional revenue) .
Resource and Production		46,742,143	This action increases the Resource and Production expense budget due to higher than anticipated costs for purchased power. SVP had higher than anticipated sales that required additional market purchases. These market purchases incurred high rates due to an increase of natural gas prices which were two to three times higher than natural gas prices in 2021. Additionally, Transmission Access Charges (TAC) rates from PG&E increased by 31.3% for Low Voltage (LV) and 29.2% for High Voltage. SVP incurs TAC for all power not generated from an SVP asset. These two factors will continue to be the main drivers increasing resource and production costs for FY 2022/23. The FY 2022/23 Resource and Production budget factored in some higher costs. SVP will monitor spend throughout the year and will come forward for budgetary actions as necessary (five affirmative Council votes required for the use of unused balances) .
Unrestricted Ending Fund Balance		(28,343,067)	This action decreases the unrestricted ending fund balance to offset the action recommended above (five affirmative Council votes required for the use of unused balances) .
