## EXHIBIT A SCOPE OF SERVICES

The Services to be performed for the City by the Contractor under this Agreement are set forth below.

The City will designate a Project Manager as the main point of contact for this contract. The Services to be performed for the City by the Contractor will include, but not be limited to, the mount and dismount of wheels and tires; wheel switching; patchable flat repairs; replacement of damaged valve stems; replacement of damaged or missing valve stem caps; tire pressure checks; tire inflation; and tire and wheel inspections. Services will include on-site "Fleet Services" for the inspection of tires mounted on City vehicles. The inspection process will include, but not be limited to, air pressure checks and adjustments; visual inspections of tread, sidewall area, valve stems, and wheels. "Fleet Services" will be provided on Fridays, excluding City holidays, for a minimum of two (2) hours starting at 10:00 am. A written report is to be submitted listing vehicles inspected and noting problems, worn tires, or irregular wear that may indicate a problem. On-site service will also include the mounting and dismounting of tires on fire trucks, and other large equipment. All passenger car and light duty vehicle wheels must be balanced using City equipment when mounted on-site. All tires mounted on-site or off-site must be torqued to the vehicle manufacturer's specifications. All flat repairs will be done by removing the tire from the rim and patching inside the tire. Tire plugs are NOT to be used. Use of a tire inflation cage is required and to be provided by the Contractor. The Project Manager may reschedule any on-site services as needed by the City with reasonable notice to the Contractor.

Each tire service worker shall be trained, certified, and familiar with the safe and proper use of the City's tire equipment prior to work assignment on City property and equipment. The City currently has a Coats 1055 tire balancer and a Coats 70X-ah-3 tire mounting machine that tire service workers will need to be trained and certified to operate.

The Project Manager or designee will monitor tire issues and determine when the cause was the Contractor. Tire repair issues (improper patch, leaking or broken valve stem, etc.) caused by the Contractor rather than a road hazard shall average less than one percent (1%) monthly. If this 1% is exceeded for two (2) consecutive months, the City will have the option of terminating the contract without advance notice.

The Contractor shall be responsible for all training and certification of their staff working under the scope of this project. All tire service workers provided by the Contractor shall have successfully completed OSHA Safety training; have appropriate certifications; and a valid California driver's license. The Contractor will provide a replacement tire service worker should the Project Manager deem the tire service worker's performance is inadequate or unsafe.

The Contractor shall only use vehicles licensed for use on public streets in Santa Clara County. All equipment used under the scope of this project shall be equipped with an

amber/yellow light bar or amber/yellow light which can be clearly seen from a minimum distance of five hundred feet (500') in all directions. All Contractor vehicles shall contain signage that includes a minimum of the Contractor's company name on both the right and left sides of each vehicle. Vehicle signage shall be sufficient for City employees and the public to identify the Contractor's company name and the type of service being provided. The Project Manager will determine the adequacy of vehicle signage during the term of this project.

Contractor will bill City on a monthly basis for Services provided by Contractor during the preceding month on an invoice and in a format approved by City and subject to verification and approval by City. City will pay Contractor within thirty (30) days of City's receipt of an approved invoice.
