Comments:		The Soil Management Plan outlines the procedures for management of subsurface soil and groundwater that may be brought to the surface and is intended to provide for the protection of workers and occupants during construction and redevelopment activities. The Plan identifies the location of the groundwater extraction and treatment system and monitoring wells in order to protect their integrity, presents general health and safety guidelines for Site construction or maintenance workers, and summarizes the portions of the Land Use Covenant that are relevant to the management of soil groundwater, and soil vapor that may be generated by future activities at the Site.

Comments:		DTSC conditionally approved the 2018 Central Plant Area Groundwater Monitoring Report. The Report did not adequately address our comment regarding groundwater containment (General Comment 2 and Specific Comment 1). While the Report does not require further revision, DTSC recommend that the 2019 Annual Groundwater Monitoring Report discuss how the containment of the existing groundwater extraction and treatment system will be evaluated beyond the hand-drawn groundwater elevation contours. This may include hydraulic modeling or aquifer testing. A plan for evaluating the continued effectiveness of the remedy was recommended.

Comments:					From January 15th through February 11th, the system was off for short periods of time due to power failures. Each time this occurred, a technician was sent to the site to restart the system as soon as possible. These power failures corresponded with severe weather events. Additionally, on March 17th, the system was off for 18 hours due to an overloaded variable frequency drive (VFD). The VFD was repaired and the system was restarted on March 18th. The total flow volume discharged to the storm drain from the system during this quarter, based on daily average flow volumes, was 2,077,904 gallons. No exceedances to the NPDES permit were observed.

Facility History:			

This property is the former site of the FMC Corporation. FMC operated a facility for the design, production, and testing of military tracked vehicles under US DOD contracts from 1951 to 1997. FMC was a hazardous waste storage and treatment facility under an interim status and certified closed in November 1996. Closure of the site involved dividing the site into areas. The Test Track Area and the Central Plant Area have been closed to industrial standards. Groundwater is impacted with organic contaminants and continues to be pumped and treated by FMC with oversight from DTSC. Both the Test Track Area and the Central Plant Area are now owned by the City of San Jose. The Plant 7 Area on the eastern portion of the site is now owned by Arcadia. On the western end is the last remnant of the FMC Corporation, an industrial facility run by the BAE Corporation which took over operations from FMC.

Document Type:					Removal Action Completion Report	
Date Completed:					3/1/2013	
Comments:					The Report documents the removal action, which consisted of excavating soil contaminated with arsenic and total petroleum hydrocarbons in the first two feet of soil, backfilling with clean imported fill, and confirmation soil sampling. Since residual soil contamination above levels that allow for unrestricted land use remains deeper than two feet below the ground surface, the remedy includes a Land Use Covenant restricting sensitive land uses on the site and requiring a soil management plan if soil deeper than two feet is disturbed.

QUARTERLY UPDATE

Quarterly Update Period: January to March 2021

Facility Closure

DTSC received the final certified closure report and accepted the closure certification. Hazardous waste is no longer being treated or stored at this location and the final facility closure is complete. The facility previously operated under a Standardized Hazardous Waste Facility permit that expired on January 8, 2019. The facility ceased operations on June 29, 2018 during bankruptcy proceedings.

FACILITY DESCRIPTION/HISTORY

ECS Refining was located at 705 Reed Street in Santa Clara. ECS was a metal recycler that operated a hazardous waste storage and treatment facility to reclaim precious and base metals from photochemical wastes, metal-bearing wastewaters, tin/lead solder dross and related wastes from electronic manufacturing, and other metal-bearing solid hazardous waste. The site was entirely paved and fenced. The facility was located in a developed industrialized area near the San Jose International Airport. The area is zoned for heavy industry by the City of Santa Clara. The facility transported hazardous wastes to the facility for recycling. Two company trucks picked up hazardous and non-hazardous wastes throughout Northern California daily. In addition, third party trucks made pickups and deliveries of hazardous and non-hazardous wastes several times daily. ECS had been operating at this location since 1979. The City of Santa Clara Historical District, a mixed use residential and commercial area, is located approximately 0.5 mile southwest, the University of Santa Clara is located within 1 mile southeast, and there are a few residences located 0.25 mile from this former facility.

PERMITTING REGULATORY DESCRIPTION/HISTORY

ECS received Standardized Permit Interim Status in 1993 and was issued a Standardized Hazardous Waste Facility Permit with an effective date of December 30, 1997. The permit expired on December 30, 2007. ECS submitted a timely renewal application in December 2006. A renewal Standardized Permit was issued on January 9, 2009 with an expiration of January 8, 2019. The Series A Standardized Permit authorized ECS to operate a hazardous waste storage and treatment facility to reclaim precious and base metals from photochemical wastes, metal-bearing wastewaters, tin/lead solder dross and related wastes from electronic manufacturing, and other metal-bearing solid hazardous wastes. Since the permit was issued in 1997, the Facility submitted four Class 1 modifications for minor operational changes and permit application updates, and had closed most of the 27 permitted units, including administrative closure of six units never operated or constructed.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Formerly Utilized Sites Remedial Action Program:

[DOE FUSRAP](#)

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List:

[NPL](#)

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Dec 30, 2021

National Priority List - Proposed:

[PROPOSED NPL](#)

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Dec 30, 2021

Deleted NPL:

[DELETED NPL](#)

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Dec 30, 2021

SEMS List 8R Active Site Inventory:

[SEMS](#)

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Dec 30, 2021

Inventory of Open Dumps, June 1985:

[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:

[SEMS ARCHIVE](#)

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Comprehensive Environmental Response, Compensation and Liability Information System -

[CERCLIS](#)

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

EPA Report on the Status of Open Dumps on Indian Lands:

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Dec 30, 2021

Federal Institutional Controls- ICs:

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Dear Requestor:

On March 1, 2022 the Department of Toxic Substances Control (DTSC) received your email of March 1, 2022 requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

DTSC's Hazardous Waste Tracking System (HWTS) may have records that pertain to this request for **2605, 2705, & 2795 The Alameda, 745 Bellomy St, and 500 El Camino Real**. This unit tracks toxic waste generators, transporters (manifests), and disposal facilities. If you are interested in this type of information, it can be identified by accessing the HWTS database at <http://hwts.dtsc.ca.gov>. If you are interested in retrieving detailed reports, additional charges may apply. Please contact the HWTS unit by email at hwtsreports@dtsc.ca.gov or by phone at (800) 618-6942 for further information. For copies of manifests, please send an email to mcr@dtsc.ca.gov.

DTSC's E-Waste unit may have records that pertain to this request for **500 El Camino Real**. "E-Waste" refers to any unwanted [electronic device](#) or Cathode Ray Tube (CRT) and is classified as universal waste. E-Waste frequently contains [hazardous materials](#), predominantly lead and mercury, and is produced by households, businesses, governments, and industries. I have forwarded your Public Records Act request to that unit for further processing. Please contact them by email at electronicwaste@dtsc.ca.gov if you are interested in this information.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

Hello Vidhya,

Thank you for your email. Based on your response, the district has no records responsive to your request. However, I would like to once again provide you with the following information and resources available regarding underground storage tanks, which may be useful to you in your research:

The oversight responsibility for investigations and clean-up of releases from underground storage tanks was transferred from the Santa Clara Valley Water District to the [Santa Clara County Department of Environmental Health](#) as of July 1, 2004. DEH files on leaking underground storage tanks have been transferred to the State Water Resources Control Board's [GeoTracker](#) database. Case files are available online at <https://geotracker.waterboards.ca.gov/>.

For more information, see Santa Clara County's [file review page](#) (<https://www.sccgov.org/sites/hazmat/programs/smp/Pages/review.aspx>)

We also recommend that you visit the Department of Toxic Substances Control's EnviroStor website for additional information related to non-DEH cleanup cases within the County at <http://www.envirostor.dtsc.ca.gov/public/>.

Solvent and toxic release sites in Santa Clara County are primarily regulated by the following Agencies:

- [San Francisco Bay Regional Water Quality Control Board](#) (Case data available through [GeoTracker](#))
- [California Department of Toxic Substances Control](#) (Case data available through [EnviroStor](#))
- [United States Environmental Protection Agency](#) (Case data for Superfund sites available through [EPA](#))
- [Central Coast Regional Water Quality Control Board](#) (Case data available through [GeoTracker](#))
- Local Fire Departments may also maintain records.

We do provide some solvent case files at: <https://www.valleywater.org/node/789>; however, please note that these files may be incomplete and not up-to-date. These files are not maintained by the district. For complete case files, including the most recently submitted reports, contact the regulatory agency overseeing the case.

Yolanda

Mike,

The link you sent me is quite useful. Thank you. Based on our conversation, I understand that the agency only has records on wells and does not have any information related to: “**Site Inspection Records/Notice of Violations, Spills, groundwater or soil sampling reports/analytical results, Underground/ Above ground Storage Tanks, Hazardous Materials, Wastewater Discharge Permits, Solid Waste Disposal Permits, Building permits, reports of chemical odors/fumes**”

If there is no other information available other than the well permits, there is no need to continue with the original request. However, if you do have anything other than the well permits, we would like to receive that.

Sincerely,

Vidhya Ramalingam, Ph.D | Environmental Engineer

Hi Vidhya,

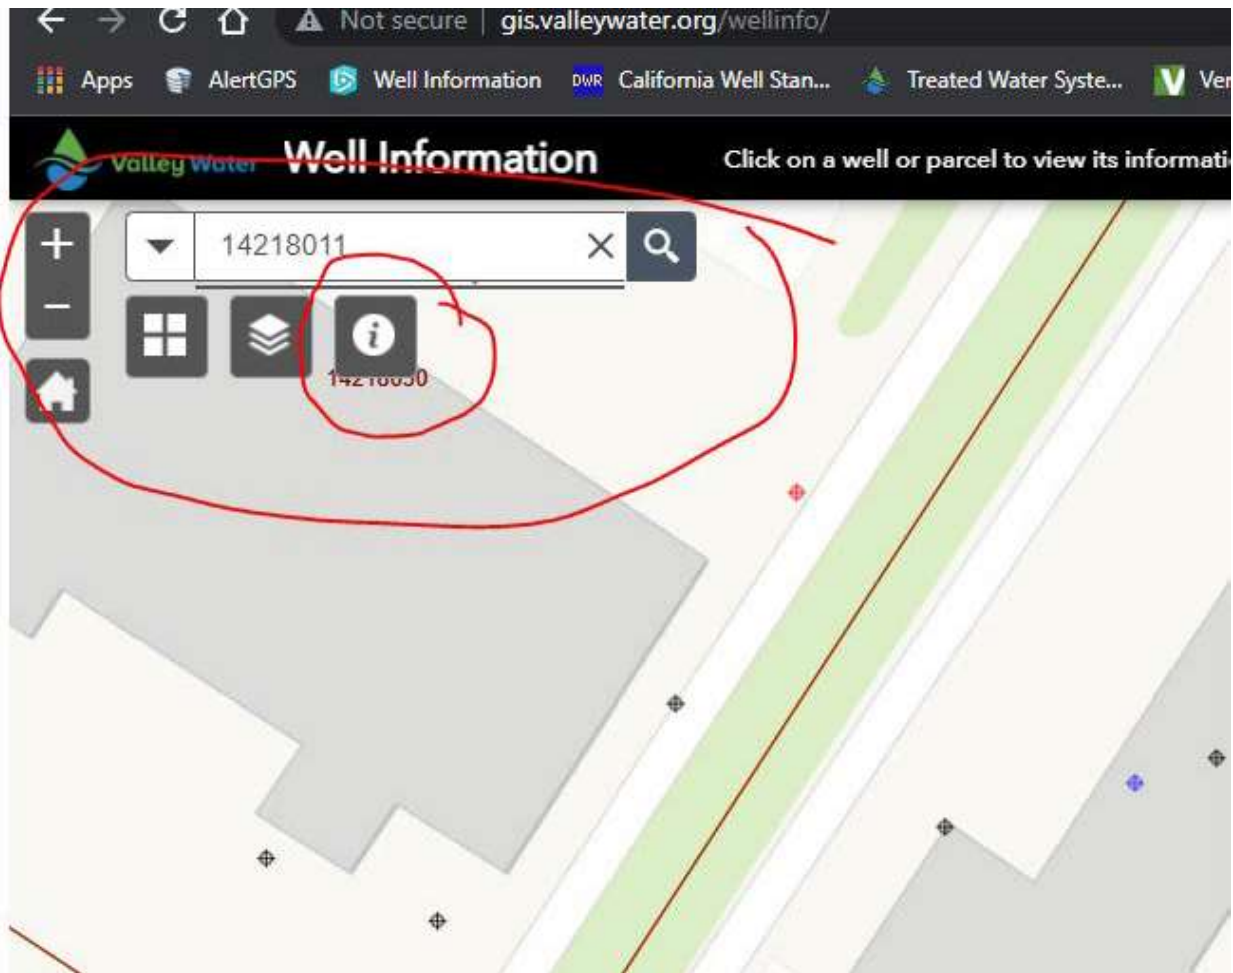

It was a pleasure talking with you.

Per our conversation, I have attached examples of a couple of the well permits for wells that are, or were, located on the properties (many are destroyed). Because pulling and copying the large amount of records associated with your request requires us a large amount of work to complete, please only request information that is germane to your needs and is actionable.

The link below will take you to our Well Information tool that can be used to view the locations of the wells on the property, view attribute data for each well, and create tables of the data associated with the wells. The tool should be opened in Google Chrome.

<https://gis.valleywater.org/wellinfo/>

Once in the tool, you can use the drop-down menu to search for well information using an APN, or address (use "Santa Clara County" to search by street address). The "i" button will give direction on how to run reports, etc.

RE: CITY DIRECTORY RESEARCH

Kapital Partners, LLC - 2655 The Alameda, Santa Clara, CA

Kapital Partners, LLC - 2655 The Alameda, Santa Clara, CA Santa Clara, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

2550-2710 of The Alameda

2850-3000 of Park Ave

700-799 of Bellomy St

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.
