Hello,

I have been trying to find a posting of the plan online, but have not come across one. It would be nice to have a link.

Anyway, on the whole I support this project. However, I reside at 1942 Graham Lane. I do not know if the sightlines from the second floor will permit persons on the second floor of 1982 (as proposed to be redeveloped) to look into my backyard. I suspect not.

If I am incorrect and persons on the second floor of 1982 (as proposed to be redeveloped) could thereby look into my backyard, then I request that second floor windows that can permit persons to look into my backyard be composed of frosted glass and transom-style or jalousie only of a kind that permits looking down into one's own yard, but not those of another.

If any of my neighbors have a similar concern, I join them in their concern.

I wish my neighbors at 1982 Graham Lane to be able to construct a home of their desire, but not at the expense of my privacy or the privacy of my neighbors. We are in fairly close proximity and we each need to accept certain standards of privacy while admitting light to upper floors. Frosted glass or wavy glass brick or similar is called for where privacy is concerned.

Sincerely,

Tahir J Naim and Sandhya Sharma  
1942 Graham Lane homeowners
