# CITY OF SANTA CLARA MUNICIPAL FEE SCHEDULE

## Reader's Guide

The purpose of this Reader's Guide is to make the City of Santa Clara FY 2025/26 Municipal Fee Schedule easier to review. The Reader's Guide highlights information contained in this document, defines terminology used in column headers, and briefly explains how voter approved Proposition 26 impacts the Schedule.

Fees, rates, and charges are intended to encompass all charges established by license, permit fees, utility charges, refuse collection and any other charges for goods and services and use of City-owned or operated facilities. Certain fees omitted from the Municipal Fee Schedule are published separately and noted on page V of this schedule. Such fees and charges published separately are unique because they are mandated by external agencies or because they receive special attention and review from City Council prior to adoption.

A comprehensive listing of the City's fees, rates, and charges, arranged in sections by department make up the City of Santa Clara Municipal Fee Schedule. During an annual review, each department recommends appropriate adjustments after considering the total costs to the City for each service provided. Costs include (1) personnel time (providing the service and collecting data), (2) equipment used, (3) material, service and supply costs, (4) department and City-wide overhead, and (5) any other costs that may be incurred that are directly related to the specific fees, rates or charges. Periodically, the City will contract with an outside consultant to perform a comprehensive review/study of fees. For FY 2024/25, ClearSource Financial Consulting completed a Cost of Services (User Fee) Study. For interim years, the majority of fees are generally proposed to increase by a cost-of-living adjustment, typically calculated as the most recent annual change in the regional consumer price index (CPI) or a change in the organization's costs. The CPI change for the most recent year was 3.5%. This minor recalibration of fees is simply intended to maintain cost recovery levels consistent with the fees previously adopted by the City Council. In addition to the general inflationary changes proposed for fees, other cost-of-living adjustments implement specific inflators for certain fees, align with mandates, and provide further clarification.

### Proposition 26

Proposition 26, passed by voters on November 2, 2010, is a constitutional amendment that introduces, for the first time, a definition of what constitutes a local tax:

*As used in this section, "tax" means any levy, charge, or exaction of any kind imposed by a local government...*

# CITY OF SANTA CLARA MUNICIPAL FEE SCHEDULE

## Reader's Guide (Cont'd.)

Under this definition, many requirements imposed by a local government that results in the local government receiving revenues are considered local taxes. This means that local government would need to obtain majority approval of the voters if the revenues are to be used for general governmental purpose and by two-thirds of voters if used for a specific purpose. In contrast, a fee may be adopted by a majority vote of City Council. There are seven (7) exceptions to this amendment under Proposition 26:

1. **Special Benefit or Privilege:** A charge imposed for a specific benefit conferred or privilege granted directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of conferring the benefit or granting the privilege.
2. **Government Service or Product:** A charge imposed for specific government service or product provided directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of providing the service
3. **Licenses and Permits:** A charge imposed for the reasonable regulatory costs to a local government for issuing licenses and permits, performing investigations, inspections, and audits, enforcing agricultural marketing orders, and the administrative enforcement and adjudication thereof.
4. **Local Government Property:** A charge imposed for entrance to or use of local government property, or the purchase, rental or lease of a local government property.
5. **Fines and Penalties:** A fine, penalty, or other monetary charge imposed by the judicial branch of government or a local government, as a result of a violation of law.
6. **Property Development:** A charge imposed as a condition of property development.
7. **The Prop 218 Exception:** Provides that property assessment and property-related fees that are already subject to the approval requirements of Proposition 218 are not taxes. Common examples include water and sewer rates and special district assessments such as Landscape and Lighting District Act assessments.

All fees, rates, and charges have been reviewed by the City Attorney's Office and meet one or more of the exceptions to Proposition 26, or are not subject to Proposition 26.

# CITY OF SANTA CLARA MUNICIPAL FEE SCHEDULE

## PUBLIC WORKS DEPARTMENT ENGINEERING DIVISION

### JUSTIFICATION FOR INCREASE IN FEES, RATES, AND CHARGES

**NOTE 1:** Fees, rates, and charges to recover costs for these types of fees/reimbursements for public improvements are proposed to decrease 0.3% from 2024/25 fees, rates, and charges, consistent with the percentage change in the Construction Cost Index (January 2024 to January 2025) as published by the Engineering News-Record.

**NOTE 2:** Fees, rates, and charges to recover costs for Field Marking – Traffic Signal Engineering Services is equal to the Field Marking – Fiber which services are performed by the same Silicon Valley Power (SVP) field staff.

**NOTE 3:** City is required to charge a pro-rated sanitary sewer conveyance fee for accessory dwelling units per City Ordinance 1968. An accessory dwelling unit is equivalent to an apartment and will be charged a sanitary sewer conveyance fee equivalent to 62.9% of the sanitary sewer conveyance fee for a single-family home. This 62.9% is based on the ratio of an apartment daily average discharge of 154 gallons per day (gpd) over a single-family home daily average discharge of 245 gpd ( $154 \text{ gpd}/245 \text{ gpd} = 0.629$ ).
