| EXPP-PL1000-INSTALL-COMMISSIONING   | This service includes both the Installation and Commissioning of the Express Plus Power Link charging station. Customers must work with their contractor to perform all construction (the "make ready") up to the point where the station can be bolted down and connected. ChargePoint will then perform the on-site validation of electrical capacity, transformers, panels, breakers, wiring, cellular coverage so that they meet all ChargePoint and local code requirements, then install and commission the station. Before installation can begin, ChargePoint requires the customer's "make ready" contractor to submit evidence of adherence to ChargePoint's standards and specifications. In addition to verifying and testing the installation, Commissioning also ensures the station is connected to the ChargePoint network, completing software updates and pairing configuration if applicable. In parallel, the ChargePoint Activations team will configure the station and apply policies according to the customer's specifications. A final Commissioning Report will be provided to the customer. Note that if Commissioning cannot be performed due to site or installation deficiencies for which ChargePoint is not responsible, the customer will incur a rescheduling fee to cover redeployment costs.
