Hello City Council members,

My name is Rosie, and I'm a part of the Santa Clara Youth Climate Action Team. I'd like to support the highlighted matrix item titled "Report on Public Transit Riders for Large Stadium Events." Stadium events have attracted many people to use public transit instead of other means of transportation. Studying the effects of this increase in public transit use could help the city in future directions regarding its public transportation system.

Thanks for listening.

My name is Rosie, and I am a member of the Santa Clara Climate Action Team. I see that the initiative titled “Lifecycle Costs/Benefits of Artificial Surfacing, Including Turf” has been highlighted for consideration. I would like to voice my support for this item. There are many natural alternatives to artificial turf, and it is important that a study be made on these alternatives in order to use the best item for surfacing in future city projects.

Thank you for your time,
Rosie
