Creating a Sustainable Santa Clara

DON'T COUNT ON WINTER RAINS TO END THE DROUGHT!

Even would-be winter rains. While it's tempting to let winter rains do the work for us, the reality is that winter rains alone won't end the drought. The City of Santa Clara is working with the community to create a sustainable future for all.

For years, Santa Clara has been proactive with water conservation programs. The city has implemented a variety of measures to reduce water usage, including water audits, water-saving devices, and public education campaigns. The city is also working with the community to create a sustainable future for all.

Visit www.santaclara.gov/sustainable for more information on the city's sustainable future.
