HISTORIC RESOURCE EVALUATION – POTENTIAL IMPACTS

DRAFT

JANUARY 17, 2023

Table of Contents

1. INTRODUCTION & METHODOLOGY

David J. Powers has requested an evaluation of a proposed project located at 4249 Cheeney Street for potential effects to historic resources adjacent to and within 200 feet of the project site. Located approximately 90 feet north of the project site, the building at 2086 Agnew Road (APN 104-12-028) is identified as a locally designated property on the City of Santa Clara's Historic Preservation and Resource Inventory. This report provides a project description, impacts analysis, and mitigation measures pertaining to the proposed project's potential effects on 2086 Agnew Road.

The proposed project was reviewed in October 2019, and since then the design has changed. This updated report takes the latest designs, dated December 15, 2022, from MFA Engineers and Associates, into consideration.

TreanorHL conducted a site visit on January 9, 2023; and reviewed the Santa Clara Historic Preservation and Resource Inventory, Santa Clara City Code Chapter 18.106 Historic Preservation, the DPR form for 2086 Agnew Road, and drawings from MFA Engineers and Associates.

2. 2086 AGNEW ROAD

The building at 2086 Agnew Road is locally designated as a historic resource. Listed on the City of Santa Clara's Historic Preservation and Resource Inventory, the Agnew School was constructed ca. 1890 and "served the surrounding community until 1927 when it was permanently closed." The building has been used as a residence ever since.[1]

Set back approximately 25 feet from the sidewalk, this tall one-story building is T-shaped in plan. The wood-frame structure has horizontal wood siding and a shingle-clad front-facing gabled and hipped roof with an enclosed cornice and a profiled frieze. A brick chimney pierces the roof at the center. The primary window type is wood-sash double-hung with simple wide trim. On the front (north) façade, a partial-width, central gabled porch with square pillars shelters the main entrance, which consists of a single wood door. The porch is raised on a concrete platform with three steps on all sides. A pair of double-hung windows flank each side of the porch. The detached garage at the southeast corner of the parcel is reached by an asphalt driveway. A two-story accessory unit is located to the southwest of the main house.

Figure 4. The building at 2086 Agnew Road, view of the north and west facades (Imagery date January 2023).

Character-defining features of the property include the following:

- Tall one-story, T-shaped massing

- Wood-frame construction
- Front-facing gabled (front) and hipped (rear) roof
- Horizontal wood siding
- Symmetrical front (north) façade
- Central partial-width gabled porch with square pillars
- Raised entry platform
- Double-hung wood-sash windows with simple trim

3. PROJECT DESCRIPTION

The project site consists of two adjacent parcels at 4249 Cheeney Street (APN 104-12-025 and 104-12-026) in the Agnew Village neighborhood of the City of Santa Clara. The 150' by 150' site is currently vacant with no existing buildings or infrastructure. Vegetation is grassy with bushes and a handful of small trees. The surrounding lots contain one- or two-story single-family houses, scattered outbuildings, and driveways. A group of two-story townhomes are located immediately east of the project site.

The project proposes nine units of two-story single-family residential townhouses, each with a two-car garage. The garages are accessed by an L-shaped paved surface drive dividing the two rows of buildings. To the north is a set of five townhomes with asphalt-clad front gabled roofs, and to the south, along Cheeney Street, is a set of four units with hipped roofs. Each unit is roughly rectangular in plan and clad in cement plaster and board-and-batten siding. A mix of operable and fixed windows are on all the units.

4. IMPACTS AND MITIGATION MEASURES

Historical resources include properties eligible for listing on the National Register of Historic Places, the California Register of Historical Resources, or a local register of historical resources (as defined in Public Resources Code §5020.1(k)). As discussed above, 2086 Agnew Road is listed on the *Historic Preservation and Resource Inventory* of Santa Clara. According to Public Resources Code §15064.5(b), a project

would have a significant effect on a historic resource if it would "cause a substantial adverse change in the significance" of that resource. Specifically, "[s]ubstantial adverse change in the significance of an historical resource means physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired."

In case of new construction, the Secretary of the Interior's Standards are applied to determine the compatibility of the proposed project with the existing historic resource. Of the ten Standards for Rehabilitation, only #9 and #10 apply to new construction.

9. *New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.*

   The proposed development does not significantly alter the immediate surroundings of the property. The density and the scale of the proposed buildings are appropriate with the height of the historic resource at 2086 Agnew Road. The proposed design is modern with simple, cubic forms; therefore, it is easily distinguished from the historic. The proposed materials; i.e. wood and cement plaster, are compatible with the adjacent historic resource and its vicinity. Overall, the project at 4249 Cheeney Street will be compatible with the massing, size, scale, and architectural features of the historic resource at 2086 Agnew Road. Therefore, the proposed project complies with Standard 9.

10. *New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.*

    The proposed development will be constructed approximately 90 feet south of the historic resource at 2086 Agnew Road. The project will not diminish the integrity of the subject building or its surroundings. If new construction were to be removed in the future, the essential form and integrity of the historic property will be unimpaired. Therefore, the proposed project complies with Standard 10.

5. CONCLUSION

The revised December 2022 project proposed at 4249 Cheeney Street is consistent with the Secretary of the Interior's Standards for Rehabilitation and will not have any impacts on the historic resource at 2086 Agnew Road. The proposed project would not cause 2086 Agnew Road to lose its current historic status as a locally designated resource. The proposed development would be contemporary but compatible with the historic resource and its surroundings. The integrity of the historic resource would not be impaired. The construction of the project would not have a direct impact on 2086 Agnew Road. The proposed project would not have an indirect impact on 2086 Agnew Road from construction activities (i.e. vibration) since the historic resource is not immediately adjacent to the development.

PROJECT SUMMARY AND SCOPE OF WORK:

THE PROJECT SITE IS A 22,500 SQUARE FEET COMBINED LOTS IN THE AGNEW'S VILLAGE NEIGHBORHOOD OF THE CITY OF SANTA CLARA. ADJACENT PARCELS 104-12-025 AND 104-12-026 FROM THE SITE WHICH HAS A150' LONG WESTERN FRONTAGE ALONG CHEENEY STREET

THE 150' X 150' PROJECT SITE IS CURRENTLY VACANT WITH NO EXISTING BUILDINGS OR INFRASTRUCTURE, UTILITIES RUN BELOW CHEENEY STREET, WITH ABOVE GROUND POWER LINES COLINEAR WITH THE SIDEWALK.

THE PROPOSED PROJECT RECEIVED EARLY CONSIDERATION APPROVAL FOR REASSIGNMENT OF USE DESIGNATION FROM VERY LOW DENSITY RESIDENTIAL TO LOW DENSITY RESIDENTIAL, ALLOWING FOR UP TO 9 UNITS ON THIS HALF ACRE SITE. THE SCHEME INTRODUCES 9 TOTAL DWELLING UNITS; EACH UNIT CONTAINS A 2-CAR GARAGE AND DRIVEWAY ACCESS VIA A PERMEABLE PAVED SURFACE LOT.

THE PROPOSED TOWNHOMES WOULD CONTAIN APPROXIMATELY 15,520 TOTAL SQUARE FEET OF INTERIOR HABITABLE SPACES, EACH OWNERSHIP UNIT AT ROUGHLY 1,724 SQUARE FEET IN AREA. EACH DWELLING IS TWO STORY AND HAS 3 BEDROOMS AND 2-1/2 BATHS.

5. CONTRACTOR SHALL PROVIDE DUST CONTROL AS REQUIRED BY THE APPROPRIATE FEDERAL, STATE AND LOCAL AGENCY.

6. THE FACILITIES SHOWN ON THIS PLAN ARE DESIGNED TO CONTROL EROSION AND SEDIMENT DURING THE RAINY SEASON, OCTOBER 15 TO APRIL 15. GRADING OPERATIONS DURING THE RAINY SEASON WHICH LEAVE DENUDED SLOPES SHALL BE PROTECTED WITH EROSION CONTROL MEASURES IMMEDIATELY FOLLOWING GRADING ON THE SLOPES.

7. FINISHED SLOPES ON THE SITE SHALL BE STABILIZED USING SEED AND STRAW OR HYDROSEED TREATMENTS.

8. UNFINISHED ROADWAY AREAS SHALL BE PROTECTED FROM EROSION AS SHOWN ON THE EROSION CONTROL PLAN. HAY BALE CHECK DAMS WILL BE REQUIRED ON ROADWAY SLOPES STEEPER THAN FIVE PERCENT.
