Subject: Feedback for 3885 Baldwin Dr

Hi Planning Committee admin,

We have some concerns regarding the updated proposal for 3885 Baldwin Dr, Santa Clara, CA 95051.

The revision for the proposal only removes the rooms on the left side on the second floor. Since there is not much of the redesign, it shows that the house is tilted to the right side. Can the owner move the upper flow to more center focused design?

Also it feels that the owner could just add the rooms in the future again because the redesign keeps all the space left there.

Thanks for addressing our concerns.

Sincerely,

Le Tang
