On June 5, 1990, the California electorate passed Proposition 111 which modified the method of adjusting the annual appropriations limit. Beginning with the 1990-91 Appropriations Limit the City may choose from one of the following indices when determining the adjustment factor:

The annual growth in the City's population OR the annual growth in the County's population as provided by the State Department of Finance.

AND

The annual growth in the California Per Capita Income OR the growth in the non-residential assessed valuation due to new construction within the City.

The 1990-91 appropriations limit was revised by applying the new growth factors to the appropriations limits for 1986-87 and each subsequent year. In computing the FY 2017-18 appropriations limit, the population growth of the County of Santa Clara and the annual growth in California Per Capita Income was used.
