*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The property is located at elevation 77 ft in the eastern section of the "Old Quad", an area of very mixed density and uses. The houses that remain on their original sites are primarily grouped by block and have a consistent set back from the street with small front yards. Many are very well kept and convey the sense of the city as it grew and in-filled with architectural styles popular during the period they were constructed. Apartment buildings often fill the deep lots and the commercial development does not convey the earlier periods. The overall impression is of a mixed use area that has continued to grow and change while retaining some of the charm of the older buildings. Beyond the general description of the area, the block of Harrison Street where 1217 is located has redeveloped over the years leaving the farm house set back on the parcel as the sole reminder of the pre-1900 development. Multi-family (apartment) buildings surround the house and across the street is a mix of later residential styles.

Period of Significance 1878-1920 Property Type house Applicable Criteria 3 Architecture
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Parker/Hudson House, c 1870s, is eligible for listing in the California Register of Historic Resources and as a Santa Clara City Landmark based upon the National Style- Vernacular Greek Revival architecture, one of the few such houses remaining in Santa Clara Valley that retains high integrity, and the association with Charles Parker & William D. Hudson, farmers, orchardists and agricultural businessman.

Architecture: The building represents the high-style of the farm houses in the Santa Clara Valley during the 1860s and the 1870s. It is derived from the "Gable Front and Wing" of the northeastern states, particularly western New York and Ohio. The character defining features of this style are the cornice design, doorway and porch-support columns, fenestration with window hoods and frames but overall minimal decoration. The style is efficient and suited to a remote farm setting.

In 2018 a rehabilitation of the building was completed. During the rehabilitation, the exterior was scrapped and prepared for new paint. The original windows were repaired and preserved. The only alterations to the exterior façade was 3 new doors that replaced non-original doors in the front and rear. The rehabilitation retained all the windows c. 1870s (continued page 4)

P3.Description cont

The wood frame building is composed of two blocks that had been joined and functioned as a duplex and then sectioned for apartments. The rehabilitation completed in 2018 retained the exterior, repairing the original windows and siding. New gutters and downspouts were installed during the rehabilitation. Interior rehabilitation removed partition walls that divided the apartments and returned the use to single-family use. The predominate interior feature of a coiled staircase was repaired and preserved. All mechanical electrical and plumbing systems were replaced to the current code. Permits are on file with the City for all rehabilitation work. The front yard was landscaped with a mix of drought resistant plants, bard ground cover, a concrete walkway to the front porch and a low wood picket style fence. The house, returned to a single-family house retains the character defining features were present in 2014 when the building was last evaluated.

The older section is two-stories constructed in a very plain National Style (vernacular Greek Revival elements) c. 1871-75. The other section is one-story c.1880s. The building a rectangular plan. First shown on the 1891 Sanborn Map, the building has not changed its form although a porch has been added. The two-story section is a front facing gable with the entry door and one tall window on the first level and two windows evenly spaced in the second level. The entry door has a semicircular (fan-light) element above it. The windows are all vertical, double-hung, with 4 over 4 (panes divided by wood (moutins) and have plain casements and frames that have corniced heads - other than the entry door, this is the only decorative detail on the building. Typical of the style, this section has boxed eaves and a plain frieze. The side façade exhibits symmetrically placed windows with 2 that are similar in style to the front façade windows each they are arranged on the two levels with a smaller plain window in the center. Only the first level windows have the cornices heads. This part of the building is sheathed in dropped (shiplap) siding (horizontal boards that milled to fit together against the wall creating a wide grove appearance between the boards. The one-story section is a side facing gable (Medium pitched roof) that has two vertical windows on the front façade and an entry door (the opening location) appears original to this section of the building. This section is sheathed in narrow board lapped siding. Following the form of the front of the building, a 3-part wrap around porch (veranda) with a shed roof is supported by 7 square posts with wood detail suggestive of an architrave with the plain board bean suggestive of a frieze. The porch is raised one step off the ground and is composed of wood plank flooring. The rear is composed of an element with a hipped roof that intersects with the gable roof. This section is pre 1891 and may have been a porch that has been enclosed and enlarged. In the 2018 rehabilitation the mudsill foundation was replaced with a concrete foundation that raised the building approximately 8 inches. The roof was not replaced and no railing or bull nosed stairs were installed at the front porch. These should be added.

The building is constructed with redwood and appears to have survived several earthquakes and the redevelopment of the area around it.

B 10 Significance Continued:

and c.1920s in the rear, from when the addition was added. The two doors that were not original were replaced with stylistic new doors.

Charles Parker: Born in Missouri in 1845, he left his family farm venturing as a teamster in the south west before returning to Missouri to farm. Leaving his home state he brought his new wife and came west to Santa Clara in 1871 purchasing a farm on Kifer Road.¹ This is also shown on the Thompson & West Historical Atlas for Santa Clara County, 1876. His wife died a year later. Parker remarried in 1876 with J. Jaimina Hudson, a Santa Clara native. In 1877 he purchased 54 acres along Scott Street and San Francisco Road (El Camino Real). By the 1880 U.S. Census Parkaer is listed as a farmer, living in Santa Clara, married to J. Jaimina Parker and they have a 2 year old daughter Edith. In the same year, the Santa Clara City Directory lists him as a rancher owning 53 acres. Parker was a liberal-conservative Democrat and registered to vote most years.¹ In 1892, he is listed in the City Directory as a rancher with his residence at Scott's Lane and San Francisco Road (El Camino Real). The 1900 U.S. Census lists Jamaina's parents William D. and Mary A. Hudson living with the Parkers at 1217 Harrison St. The 1880 U.S. Census does not list addresses but it lists the Hudsons above the Parkers, in Supervisor District 1 (Old Quad). It appears from the listing that the Hudsons and Parkers may have been living together before 1880. This may be the reason the side addition was constructed on the house. Both Parker and his father-in-law are listed as farmers. In the listing he is described as an orchardist, although it appears from previous listing that he maintained an onion seed farm. In 1904, Ethel Parker (26) married Frank Stewart and in 1910, the Hudsons had moved to University Avenue in San Jose. The younger couple had moved in with her parents.² Frank Stewart was a businessman and by 1908, the City Directory lists his business as Parker & Stewart Seed Growers. Five years later, in 1913 he is listed in the fuel business on Main St. The business grew into 'Stewart Feed-Fuel and Building Materials' located at 1075 Franklin St. In September 1918, William registered for the WWI Draft. The U.S. Census taken in 1920 lists Charles (74) and Jemima Parker (67), Ethel Parker Stewart (42), Frank W. Stewart (42) and their daughter Nadine Stewart (14) living at 1217 Harrison St. Both Charles Parker and William Stewart died during the late 1920s. Ethel Stewart continued to live in the house with her daughter Nadine. Nadine attended Stanford University to become a teacher.³ In 1939, Ethel Stewart sold the subject property to A. E. Bender. The property was sold again in 1943, to Glen B. Davis who subdivided the surrounding block in 1945. The City Directory lists the conversion of the Parker/Hudson house to apartments in 1959.

Santa Clara's Historical Context for Evaluation:

The property is compared within the context of the American Settlement Period 1848-1900. During this period Santa Clara experienced extensive growth in

agriculture and the beginning of manufacturing. This period is known for its predominance of lumbering, cattle (hides), trading and agriculture as farms and ranches surrounded the city. It also marks the start of the Valley's heritage of higher education when the Santa Clara College was founded in 1851. By 1852, stage coach and steamer service to San Francisco operated regularly. The verdant hills provided the natural resources for the lumber industry to develop and to engage in trade which contributed to residential and local economic growth. By 1870 businesses lined the surveyed streets, saddle and harness maker, doctor, banks, dry goods emporiums and markets. On the edges of town were flour mills, paper mills, tanneries and in the 1870's Pacific Manufacturing Mill opened to produce window frames and sash. The company would grow to the largest such mill in California. In 1878 C.C. Morse opened the seed company that would become an industry leader. The increased population formed Protestant Churches and social organizations that added to the earlier Catholic institutes. The 1887 Sanborn Map Publishing Company listed five churches, two breweries, three tanneries and businesses grouped around a central plaza between Jackson, Washington, Santa Clara and Franklin streets. Residential streets extending from the plaza became known as the Old Quad Area.

During the first fifty years of California's statehood, the coming of the continental railroad in 1869, is regarded as one of the most far-reaching changes to the San Francisco Bay Area. Rail service connected California but the opportunity for passenger and freight service to the rest of the nation opened markets that would allow agriculture, wine and the food processing industry to lead the 1900's economy to a time of significant growth and development.

The climate and rich soil brought many new residents. The period 1870 through 1900 was one of growth for Santa Clara. Residential neighborhoods expanded beyond the central quad area along surveyed streets. Many of these streets in the city grid were named for presidents and divided with large lots, often a quarter of a block, that would be further subdivided to form urban size frontages with houses facing each other with similar size front yards, across the streets.

The Parker/Hudson House transcends the decades before the turn of the century providing an historical resource that tells the story of a multi-generational farm family during the era when farming and raising fruit was the largest economic industry in Santa Clara County. The house retains the original 1870-1800 design, materials, workmanship and association with Charles Parker, William Hudson, and Frank Stewart, as well as their wives and children. The setting has been significantly altered from the semi-rural 1890s and the feeling of a farmhouse is elusive in the urban setting. There is a question that the building may have been moved on the Parker property to locate it within the surveyed residential area that was closer to the center of town. These factors affect the finding of integrity as defined by the National Register of Historic Places. With the consideration that it may have been moved c. 1880 the building is found to retain integrity sufficient for the California Register of Historic Resources and to convey the reason for its significance- a National Style farm house c. 1870, of which there are few remaining.

EVALUATION USING THE CRITERIA OF THE CALIFORNIA REGISTER OF HISTORIC RESOURCES

State of California The Resources Agency
DEPARTMENT OF PARKS AND RECREATION
CONTINUATION SHEET

Primary
HRI #
Trinomial

#

Page 6 of 21 *Resource Name or # (Assigned by recorder) 1217 Harrison St, Santa Clara
*Recorded by: Urban Programmers *Date 5/24/2014 updated 9/27/2018 x Continuation X Update

The criteria for listing historical properties in the California Register of Historical Resources are consistent with those for listing resources in the National Register of Historic Places, but have been modified for state use in order to include a range of historical resources which better reflect the history of California. This criteria is the basis for determining a historic resource under CEQA. An historical resource must be significant at the local, state or national level under one or more of the following four criteria;

1. It is associated with events that have made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.
2. It is associated with the lives of persons important to local, California, or national history;
3. It embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of a master or possesses high artistic values; or
4. It has yielded, or is likely to yield, information important to the prehistory or history of the local area, California, or the nations.

In addition, the resource must retain enough of its historic character or appearance to be recognizable as a historic property, and to convey the reason for its significance.

Definition of Integrity

Integrity refers to a property's ability to convey its significance. Significance is conveyed by the retention of a resource's visual and physical characteristics and its surroundings. The National Register criteria recognize seven aspects of integrity. The seven aspects of integrity are location, design, setting, materials, workmanship, feeling, and association. To retain historic integrity, a property will always possess several, and usually most, of these aspects.

Properties must have sufficient integrity in addition to meeting the criterion for significance in order to be considered a qualified historic resource.

Criteria 1. *It is associated with events that have made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.*

A farm house, it appears the building (two-story section) was moved to this location and meets the criteria for having been associated with the broad pattern of agricultural growth or development.

Criteria 2. It is associated with the lives of persons important to local, California, or national history

The original owner of the house was a farmer and seed producer as was his father-in-law and son-in-law. None of these appear to have been individually important to local history.

State of California The Resources Agency
DEPARTMENT OF PARKS AND RECREATION
CONTINUATION SHEET

Primary
HRI #
Trinomial

#

Page 7 of 21 *Resource Name or # (Assigned by recorder) 1217 Harrison St, Santa Clara
*Recorded by: Urban Programmers *Date 5/24/2014 updated 9/27/2018 x Continuation X Update

Criteria 3. *It embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of a master or possesses high artistic values.*

The subject building embodies the distinctive characteristic of a c. 1870 National Style (Greek Revival Elements) farm house, of which there are few remaining. This simple style was the most popular style for farm houses across the nation, 1850-1880. It was efficient and could be enlarged with a side addition when the family grew as is seen in the subject building.

Criteria 4. *It has yielded, or is likely to yield, information important to the prehistory or history of the local area, California, or the nations.*

It is unlikely that significant information important to prehistory or history would be found on this site. The simple construction methods and materials or a trash pit behind the house may provide some information but it is unlikely to be important in the study of history.

Finding: The Charles Parker/William D. Hudson House meets the Criterion 1 & 3 and is eligible for listing in the California Register of Historic Resources as an example of the National Style Farm House c. 1870 that retains a high degree of integrity and of which there are few remaining.

CITY OF SANTA CLARA - GENERAL PLAN REGARDING HISTORIC PROPERTIES:

In 1979, William Zavlaris of Urban Rural Conservation, consultants working under contract to the City of Santa Clara to survey the City to identify historically important buildings, evaluated the property at 1217 Harrison Street, prior to the City Council adopting the following criteria. At that time, the property rated a level of significance to be included in the City's Inventory of Historical Resources. In 2014 the property was evaluated under the current criteria by Urban Programmers (Bonnie Bamburg and William Zavlaris) and found to be a significant historical resource eligible for landmark status. The current 2018 evaluation considers the previous survey (DPR) and evaluates the property after rehabilitation using the criteria adopted as part of the Santa Clara General Plan in 2004.

The Santa Clara General Plan "Structures of historic or architectural significance shall be identified and documented and efforts shall be made to preserve them". The Municipal Code Section 18.58.030 - Designation

...the historical Landmarks Commission shall consider the listings in the National Register of Historic Places, the California Historical Landmarks Program, the Santa Clara County Preliminary Inventory of Historic Landmarks, and City's historical survey, and other compilations of historical buildings and sites. The Commission shall evaluate the proposed landmark for its

Page 8 of 21 *Resource Name or # (Assigned by recorder) 1217 Harrison St, Santa Clara
*Recorded by: Urban Programmers *Date 5/24/2014 updated 9/27/2018 ☒ Continuation ☒ Update

historical or cultural uniqueness or as an outstanding local example of an architectural style or building techniques.

Criteria for local significance (Adopted by the City Council on April 8, 2004)

Qualified Historic Resource

Any building, site, or property in the City that is 50 years old or older and meets certain criteria of architectural, cultural, historical, geographical or archeological significance is potentially eligible.

Criteria for Historical or Cultural Significance

To be historically or culturally significant, a property must meet at least one of the following criterions:

1. The site, building or property has character, interest, integrity and reflects the heritage and cultural development of the city, region, state, or nation.

The building at 1217 Harrison St reflects the heritage and development of the city as a representative 1870s farm house and the setting shows infill development patterns.

2. The property is associated with a historical event.

No historically important event is associated with the property.

3. The property is associated with an important individual or group who contributed in a significant way to the political, social and/or cultural life of the community.

The property is associated with Charles D. Parker, William D. Hudson and Frank Stewart who were farmers and a seed producer and a retail businessman, respectively. This history does not constitute persons of importance in the City of Santa Clara. Information did not uncover an individual event of importance.

4. The property is associated with a significant industrial, institutional, commercial, agricultural, or transportation activity.

The property is not associated with a significant industrial, institutional, commercial, agricultural, or transportation activity.

5. A building's direct association with broad patterns of local area history, including development and settlement patterns, early or important transportation routes or social, political, or economic trends and activities. Included is the recognition of urban street pattern and infrastructure.

The building is a representative of the settlement architecture, 1870-1900 and patterns of urban growth.

Page 9 of 21 *Resource Name or # (Assigned by recorder) 1217 Harrison St, Santa Clara
*Recorded by: Urban Programmers *Date 5/24/2014 updated 9/27/2018 x Continuation X Update

6. A notable historical relationship between a site, building, or property's site and its immediate environment, including original native trees, topographical features, outbuildings or agricultural setting.

There is a historical relationship between the building and the site although as mentioned above the setting urban mixed use, and the lack of ancillary buildings (barn, shed water tank) diminish the relationship.

Criterion for Architectural Significance

To be architecturally significant, a property must meet at least one of the following criterion:

1. The property characterizes an architectural style associated with a particular era and/or ethnic group.

The house is an example of the severe architecture of the early National Style (Stripped Greek Revival) farmer house.

2. The property is identified with a particular architect, master builder or craftsman.

The designer or carpenter for the building was not identified.

3. The property is architecturally unique or innovative.

The house is not architecturally unique or innovative. It is a variation of what is known as National or Stripped Greek Revival style.

4. The property has a strong or unique relationship to other areas potentially eligible for preservation because of architectural significance.

The immediate area has been changed from a semi-rural residential street to one of mixed residential uses. There is not a strong or unique relationship with the immediate area. There are areas of the Old Quad where a house of this age and style would have be more compatible.

5. The property has a visual symbolic meaning or appeal for the community.

The house does not appear to have a visual symbolic meaning in the community. It is set back from the other buildings on the street and overwhelmed by the apartment buildings that surround it.

6. A building's unique or uncommon building materials, or its historically early or innovative method of construction or assembly.

The building appears to have been constructed using materials common

Page 10 of 21 *Resource Name or # (Assigned by recorder) 1217 Harrison St, Santa Clara
*Recorded by: Urban Programmers *Date 5/24/2014 updated 9/27/2018 x Continuation X Update

to the era and is not innovative in the method of construction.

7. A building's notable or special attributes of an aesthetic or functional nature. These may include massing, proportion, materials, details, fenestration, ornamentation, artwork or functional layout.

The building is notable as an example of a farm house from its era, 1860-1880.

Criteria for Geographic Significance

To be geographically significant, a property must meet at least one of the following criterions:

1. A neighborhood, group or unique area directly associated with broad patterns of local area history.

The building is not in close proximity to other similar homes that would create a sense of the broad patterns of local history.

2. A building's continuity and compatibility with adjacent buildings and/or visual contribution to a group of similar buildings.

The building is not compatible with the buildings in the immediate area and therefore does not provide a historical visual contribution to the community.

3. An intact, historical landscape or landscape features associated with an existing building.

There is not a historical landscape or features associated with the building.

4. A notable use of landscaping design in conjunction with an existing building.

There is not a notable use of landscaping design, in fact there is very little landscape on the property.

Finding: The evaluation of the historical and architectural qualities of the property allow the conclusion that the property at 1217 Harrison Street remains eligible for listing in the Historic Resources Inventory and meets the criteria for Historic Landmark status because it exhibits the style, materials and methods of construction of a farm house c. 1860-1880. However, the development around the house is mixed styles of multi-family buildings creating a setting in which the historic building is not compatible with the newer development and that diminishes the ability of the Parker/Hudson house to contribute to the historic streetscapes of pre-1900 architecture found in the Old Quad. The rehabilitation and new landscaping has given the house more prominence in the neighborhood.

The Secretary of the Interior's Standards for Rehabilitating Historic Buildings. Identification, Protection, Repair Rehabilitation and Preservation:

I. The Secretary of the Interior's Standards for Rehabilitation of Historic Buildings.

The Secretary of the Interior's Standards for Rehabilitating Historic Buildings were created by the National Park Service, Cultural Resources Division, in 1978 providing a framework to guide rehabilitation work for projects that were Certified Historic Structures and applied to use investment tax credits. Since that time the "Standards" have been expanded by introducing element specific guidance in the "Guidelines" and these have been adopted by many governmental agencies to promote the same level of guidance to projects that are determined to be local landmarks and/or historic resource properties. The California Environmental Quality Act considers alterations, changes and/or additions to a historic resource to create less than a significant adverse change to the resource. The definition and Secretary of the Interior's Standards for Rehabilitation are as follows:

"Rehabilitation" is defined as "the process of returning a property to a state of utility, through repair or alteration, which makes possible an efficient contemporary use while preserving those portions and features of the property which are significant to its historic, architectural, and cultural values."¹

The Standards are to be applied to specific rehabilitation projects in a reasonable manner, taking into consideration economic and technical feasibility.⁴

Standard 1. A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.

The rehabilitation returned the historic use as a single- family residence

Standard 2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

The rehabilitation preserved the historic character of the house. The features of size, mass and materials were preserved. The design was unaltered preserving the siding, window, window frames and door frames. The interior design retains the coil staircase and repaired the balustrade. The removal of interior wall surfaces allowed replacement of failing or not safe systems for electricity, plumbing, HVAC. All the replaced systems promote the continued use as a single-family residence and preservation of the historic building.

The parcel, retains the historic setback and spatial relationship of the house on the block.

Standard 3 Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.

The rehabilitation replaced a non-original front door with a stylistic front door but did not add any conjectural features.

Standard 4. Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.

The addition to the side of the original house is considered to have achieved importance and was treated with the same care as the original house. It was rehabilitated and preserved.

Standard 5. Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a property shall be preserved.

The rehabilitation repaired and preserved the distinctive features of the house.. The craftsmanship and historic wood pieces were preserved.

Standard 6. Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.

The wood house lacked appropriate maintenance for many years resulting in areas of serious deterioration. The historic window systems were in poor repair with lower siles exhibiting the most deterioration. The windows and all frames, were repaired. The wood siding and porch were also repaired and where necessary replaced with with wood to match the original. The repair of wood elements preserves the historic craftsmanship and features into the future..

Standard 7. Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.

Harsh destructive chemicals were not used in the rehabilitation.

Standard 8. Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.

The excavation for the new foundation did not uncover any archeological material.

Standard 9. New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

No additions were constructed

Standard 10. New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

No additions were constructed.
