

12/11/18

5:00pm
Study Session
Item #3

City of Santa Clara
The Center of What's Possible

Total Compensation Overview

Total Compensation generally consists of four primary elements:

1. Salary – compensation paid to an employee
2. Insurance – Medical, Dental, Vision, VEBA, Life Insurance
3. Retirement – CalPERS and Social Security
4. Other Benefits – Medicare, Employee Assistance Program (EAP), Long-term Disability

Note: May differ based on negotiated MOU

2

Components of CalPERs Pension Costs

The minimum required employer contribution includes the sum of two components:

1. **Employer Normal Rate** – the annual cost for the fiscal year for active employees' pension. This is shown as a percentage of payroll and is paid as part of the payroll reporting process
 - FY 19/20 Safety Rate – 20.877%
 - FY 19/20 Miscellaneous Rate – 10.667%
2. **Employer Amortization of Unfunded Accrued Liability (UAL)** – a fixed dollar amount needed to fully fund past service credit earned by current and former employees. The UAL is billed monthly to the City or can be paid in a lump sum.
 - FY 19/20 Safety Cost – \$16.6 million
 - FY 19/20 Miscellaneous Cost - \$20.2 million

3

Components of CalPERs Pension Costs

- **Employee Rate** – employee's share of pension costs
 - Safety Rate – 9%
 - Police Safety Classic members pay an additional cost sharing rate of 2.25%
 - Miscellaneous Rate – 8%
- **PEPRA** – California Public Employees' Pension Reform Act of 2013
 - FY 19/20 Safety Rate – 10.50%
 - FY 19/20 Miscellaneous Rate – 6.50%

4

PERSable Wages

- Normal rate of pay
- Not all compensation is “PERSable” - generally excludes:
 - Overtime
 - Bonuses or one-time payments
 - Leave payouts

5

Pension Trends

- Significant year over year increases of contribution rates both in the past and future
- Unfunded liability increasing
- Pension costs rising due to actuarial methodology changes, demographic assumption changes, de-risking policies
- CalPERS investment returns have large fluctuations

6

Unfunded Accrued Liability (UAL)

- Cost of benefits provided by employer but not yet fully funded
- Current unfunded liability totals more than \$500 million
- Changes each year dependent on investment returns and CalPERS Board changes to actuarial methodology changes, demographic assumption, de-risking policies

7

Fiscal Planning

- As a current practice, City contracts with Bartel to do an analysis of the CalPERS actuarial report to advise on the fiscal impact
- CalPERS reports come out each year and provide two years of projections
- Bartel projects long term rates
- City incorporates Bartel projections into the 10 year financial forecast

8

Pension Cost – Forecasted Impacts

- Large increases in projected contributions
- With FY 2019/20 Preliminary Forecast
 - Change in methodology funding of UAL from percentage to fixed dollar to create budgetary savings
 - UAL Dollar increase \$2.4m Safety, \$2.6 Misc from 18/19
- 10-Year Impact - FY 2029/30 UAL contribution
 - Safety UAL \$32.2m up 94% from 19/20
 - Misc UAL \$31.7m up 57% from 19/20

HOW WE GOT HERE

- Investment Losses
- CalPERS Contribution Policy
- Enhanced Benefits
- Demographics

December 11, 2018

1

HOW WE GOT HERE – INVESTMENT RETURN

Above assumes contributions, payments, etc. received evenly throughout year.

December 11, 2018

2

HOW WE GOT HERE – OLD CONTRIBUTION POLICY

- Effective with 2003 valuations:
 - Slow (15 year) recognition of investment losses into funded status
 - Rolling 30 year amortization of all (primarily investment) losses
- Designed to:
 - First smooth rates and
 - Second pay off UAL
- Mitigated contribution volatility

December 11, 2018

3

HOW WE GOT HERE – ENHANCED BENEFITS

- At CalPERS, Enhanced Benefits implemented using all (future & prior) service
- Typically not negotiated with cost sharing

■ City of Santa Clara	Tier 1	Tier 2	PEPRA
● Miscellaneous	2.7%@55 FAE1	N/A	2%@62 FAE3
● Safety Police	3%@50 FAE1	N/A	2.7%@57 FAE3
● Safety Fire	3%@50 FAE3	N/A	2.7%@57 FAE3

- Note:
 - ☐ FAE1 is highest one year (typically final) average earnings
 - ☐ FAE3 is highest three years (typically final three) average earnings

December 11, 2018

4

HOW WE GOT HERE – DEMOGRAPHIC

- Around the State
 - Large retiree liability compared to actives
 - State average: 55% for Miscellaneous, 65% for Safety
 - Declining active population and increasing number of retirees
 - Higher percentage of retiree liability increases contribution volatility
- City of Santa Clara percentage of liability belonging to retirees:
 - Miscellaneous 64%
 - Safety 71%

9

CALPERS CHANGES

- Contribution policy changes:
 - No asset smoothing
 - No rolling amortization
 - 5-year ramp up
 - Included in 6/30/13 valuation (first impact 15/16 rates; full impact 19/20)
- Assumption changes:
 - Anticipate future mortality improvement
 - Other, less significant, changes
 - Included in 6/30/14 valuation (first impact 16/17 rates; full impact 20/21)
- CalPERS Board changed their discount rate:

	<u>Rate</u>	<u>Initial</u>	<u>Full</u>
● 6/30/16 valuation	7.375%	18/19	22/23
● 6/30/17 valuation	7.25%	19/20	23/24
● 6/30/18 valuation	7.00%	20/21	24/25
- December 2018: CalPERS Board selected asset allocation similar to current portfolio. No change to the discount rate.

December 11, 2018

7

CALPERS CHANGES

- Risk Mitigation Strategy
 - Move to more conservative investments over time
 - Only when investment return is better than expected
 - Lower discount rate in concert
 - Essentially use ≈50% of investment gains to pay for cost increases
 - Likely get to 6.0% over 20+ years
 - Risk mitigation suspended until 6/30/18 valuation
 - February 2018 CalPERS adopted new amortization policy
 - Applies only to newly established amortization bases
 - Fixed dollar amortization rather than % pay
 - Amortize gains/losses over 20 rather than 30 years
 - 5-year ramp up (not down) for investment gains and losses
 - No ramp up/down for other amortization bases
 - Minimizes total interest paid over time and pays off UAL faster
 - Effective June 30, 2019 valuation for 2021/22 contributions
- Included in this study

CONTRIBUTION PROJECTIONS - MISCELLANEOUS

■ Investment Return:

- June 30, 2018 8.6%²
- Future returns based on stochastic analysis using 1,000 trials³

	<u>25th Percentile</u>	<u>50th Percentile</u>	<u>75th Percentile</u>
Current Investment Mix	0.1%	7.0%	14.8%
Ultimate Investment Mix	0.8%	6.0%	11.4%

- Assumes investment returns will generally be 6.5% (as compared to 7.0%) over the next 10 years and higher beyond that.
- ### ■ Assumption Changes – Discount Rate
- Decrease to 7.0% by June 30, 2018 valuation
 - Additional Discount Rate decreases due to Risk Mitigation policy.
- ### ■ No Other: Gains/Losses, Method/Assumption Changes, Benefit Improvements
- ### ■ Different from CalPERS projection

² based July 2018 CalPERS press release

³ Nth percentile means N percentage of our trials result in returns lower than the indicated rates.

December 11, 2018

15

CONTRIBUTION PROJECTIONS - MISCELLANEOUS

■ New hire assumptions:

- 62.5% of 2018/19 hires are PEPRA members and 37.5% are Classic members
- Percentage of PEPRA member future hires to increase from 62.5% to 100% over 15 years

24

PAYING DOWN THE UNFUNDED LIABILITY & RATE STABILIZATION

- Where do you get the money from?
- How do you use the money?

December 11, 2018

37

WHERE DO YOU GET THE MONEY FROM?

- POB
- Borrow from General Fund similar to State
- One time payments

December 11, 2018

38

HOW DO YOU USE THE MONEY?

- Internal Service Fund
- Make payments directly to CalPERS
- Irrevocable Supplemental (§115) Trust

December 11, 2018

39

IRREVOCABLE SUPPLEMENTAL (§115) PENSION TRUST

- Consider:
 - How much can you put into Trust?
 - ☐ Initial seed money?
 - ☐ Additional amounts in future years?
 - When do you take money out?
 - ☐ Target budget rate?
 - ☐ Year target budget rate kicks in?
 - Before or after CalPERS rate exceeds budgeted rate?

December 11, 2018

40

26

APPENDIX – DEFINITIONS

Present Value of Benefits
June 30, 2017

■ Present Value of all Projected Benefits:

- The value now of amounts due to be paid in the future

■ PVB - Present Value of all Projected Benefits:

- Discounted value (at valuation date - 6/30/17), of all future expected benefit payments based on various (actuarial) assumptions

■ Current Normal Cost:

- Portion of PVB allocated to (or “earned” during) current year
- Value of employee and employer current service benefit

■ Actuarial Liability:

- Discounted value (at valuation date) of benefits earned through valuation date [value of past service benefit]
- Portion of PVB “earned” at measurement

December 11, 2018

i

APPENDIX – DEFINITIONS

Present Value of Benefits
June 30, 2016

Present Value of Benefits
June 30, 2017

■ Target- Have money in the bank to cover Actuarial Liability (past service)

■ Unfunded Liability - Money short of target at valuation date

■ Unfunded Liability - Money short of target at valuation date

- If all actuarial assumptions were always exactly met, then the plan assets would always equal AAL
- Any difference is the unfunded (or overfunded) AAL
- Every year, the actuary calculates the difference between the expected UAAL and Actual UAAL. This is a new layer or amortization base
- Each new layer gets amortized (paid off) over a period of time as part of the contribution [rate].

December 11, 2018

ii

Key Takeaways

- Pension costs are a significant component of total compensation
- Further adjustments and increases are likely – will be difficult to absorb without additional revenue or cost savings
- Pension costs continue to increase but will eventually decrease as more employees enroll in PEPRA
- Staying disciplined in long term planning will continue to serve the City's residents and businesses well
- Using the 10-year financial forecast provides us with the time to make adjustments
