
Follow Up Flag:	Follow up
Flag Status:	Completed

It's a little hard to capture my idea in an email, but I'll try. The biggest departure from 2B is that the landscaping would be between the street and the bike lane, and the bike lane and sidewalk would be adjacent but with a difference in the pavement, and markings to indicate feet and bicycles. You could have bike parking hoops on the boundary between them to make it more visible.

	total
2 foot median	2
10 foot left turn lane	12
3 11 foot car traffic lanes	45
2 foot gutter	47
4 foot landscaping	51
5 foot bike lane	56
10 foot sidewalk	66 feet

3 11 foot car traffic lanes	99 feet
2 foot gutter	102 feet
3 foot landscaping	105 feet
5 foot bike lane	110 feet
10 feet sidewalk	120 feet

This ends up having a smaller landscaping on one side than the other but it could be split evenly at 3.5 feet

DO NOT NARROW TRAFFIC LANES

DO NOT REMOVE "PARK CHOP" ISLANDS

OK TO REMOVE ON-STREET PARKING

EL CAMINO REAL SPECIFIC PLAN

Workshop #3

Comment Card

Treat ECR as a traffic corridor.

EL CAMINO REAL SPECIFIC PLAN

Workshop #3

Comment Card

Good meeting with lots of discussion. Big topic over bike lane. My position is to provide bike lanes on roads that are off El Camino Real. I also believe the attendees were mostly bikers and were vocal for bike lanes on El Camino. I wonder if the plan is already set for bike lanes. That is disappointing since bikers are hazardous to both cars and pedestrians at intersections.

I would also like a lite rail transit rather than buses that move across lanes and slow traffic significantly.

www.santaclaraca.gov/scr

when buses change lanes. My preference is lite rail and no bike lane. Lite rail would take up 3 lanes.

EL CAMINO REAL SPECIFIC PLAN

Workshop #3

Comment Card

Please keep lanes at 12'

Use 5' easement ^{next to existing sidewalks} as bike lane
for long term plan or where trees
are proposed on all 3 plans.

Keep existing street parking
and park chop islands at
intersections.

→ As properties are redeveloped
have property owners add, trees
(and maintain)
along sidewalks. - Reduce city upkeep!

EL CAMINO REAL SPECIFIC PLAN

The presenter lost control of his presentation letting the crowd take over. I just wanted to hear the presentation but I had to listen to all kinds of issues not pertaining

The information was good but most people thought this was set in "stone", he didn't understand it was a "comment" presentation,

EL CAMINO REAL SPECIFIC PLAN

Workshop #3

Comment Card

From Ken Kratz:

- 1) Include bike lanes
- 2) Add free shuttle, say border to border & accessing train depot & university
- 3) All buildings should be mixed use (housing & businesses)
- 4) Much of the housing should be subsidized, i.e. public housing,
- 5) Keep sunshine on ECR, i.e. don't build too high

EL CAMINO REAL SPECIFIC PLAN

Workshop #3

Comment Card

Diane Harrison:

2019- Remove on-street parking and paint bike lanes during Caltrans re-paving. All businesses have a parking lot, but those still concerned can offer incentives to employees & customers to ride a bike or walk or take the bus. (I can provide more details on request.)

Specific Plan. 2A is ok IF between bus stops, bicyclists can enter/exit the bike lane at will. There should be no other physical barriers. 2B is ok too. We have to keep GHD requirements in mind.

EL CAMINO REAL SPECIFIC PLAN

Workshop #3

Comment Card

EL CAMINO REAL SPECIFIC PLAN

Workshop #3

Comment Card

Eliminating the pork chop island at El Camino Monroe (going east) is a ~~big~~ disaster. The turn is at 45 degrees onto a very narrow line. The corner could have been curved to let you turn right without a 45° angle. The go thru light is not to the lane going south. Keep the bike lanes.

From: yerduanna <yerduanna@yahoo.com>

To: Planning; Steve Le
Subject: ECR CAC on December 17, 2018

I attended Workshop #3 on December 13, 2018 at the Santa Clara Central Library that presented options for transportation on El Camino Real. A stated goal of ECR planning is to remove the automobile strip malls along El Camino Real.

Without plans for land management, transportation plans cannot be adequately defined. Currently, ECR contains three lanes of traffic in each direction, one additional lane for parking, and one left turn lane at appropriate intersections. This configuration accommodates bus and automobile traffic only and is captured in Row Alternatives 1 in the presentation on December 13.

Without automobile parking facilities to accommodate restaurants located on ECR, it is inconceivable to eliminate on-street parking on ECR. There is no discussion of parking structures along ECR to accommodate visitors to restaurants, residences, or retail buildings or any of the facilities on ECR. Multi-unit apartments will provide some, but insufficient, parking for residences but parking for visitors will not be adequate. Parking for restaurants requires parking structures or on-street parking. Location of parking structures is another issue to consider. El Camino Real access from side street intersections would be a four block or more walk from Lincoln Avenue to Lawrence Expressway and beyond. Location of public parking structures could hinder all ECR retail facilities and restaurants and ECR off-street parking is not a winner.

Bus and automobile lane sharing is an accident waiting to happen; primarily with auto lane changing to avoid bus movements or to pass a bus. Public transportation must be accommodated on El Camino Real but a light rail system with dedicated lanes needs to be considered opposed to bus systems. The light rail would need a direct BART facility connection with connection to the airport. Light rail systems do have cars to accommodate bikes. This seems to be a better transfer option for bikers than a bike lane.

Bike use on El Camino Real can only exist if the bike lane is protected with hard barriers and fences. El Camino is a high traffic street and has lots of lane-changing vehicles. An open bike lane is inadequate protection for bikers. It is often dangerous to adults; it is hazardous for children. An open bike lane available to children is not an option. Figure 5.7-3 in the Santa Clara General Plan document illustrates the bicycle network. There are significant E-W bike lanes paralleling El Camino Real with a side street bike lane access every four or more side streets. If automobile passengers

would need to walk four or more blocks after parking in a parking structure or a side street, it is not out of line to have bikers walk their bikes four or more blocks to their destination.

Steve:

Thank you for your email. In addition to the survey, I would like to add the following comments regarding the Land Use section of El Camino Real Specific plan:

I believe the dividing line between the mix use properties and the exiting homes should be extended to the edge of the streets behind the mix use areas. The streets will provide adequate buffer between the new developments and the existing homes. In addition, as part of the design guidelines, landscaping can be required between the concrete sound walls along their rear property lines and the streets to further soften the impact of the new developments. The benefit of this suggestion is that future developments will not directly butt the existing single family homes reducing any aesthetic or noise impacts. As the result, there will be less oppositions at the hearings during the permit process.

Subject: El Camino Specific Plan:

Dear Council and Planning Commission;

I went to the "public" ECR Specific Plan meeting the other night. Apparently there had been one prior meeting of this group. Before I could even open my mouth, the city paid moderator saw my name tag and I was told I could listen but could not speak (at all, to anyone), "because I had not been at the previous meeting". I said fine and sat there by myself until some people I knew saw what they had done and invited me over to their table. I sat and only listened why the developer at my table spouted out numbers which no one could confirm or refute. Basically he said, since the entirety of ECR was zoned for 50 units per acre, the price of land has risen so much now they needed at least 100 units per acre to "break even". They had what they called "Activity Zones". These were basically anywhere that was not already permitted or built at 50 units per acre or more. In the Activity Zones they wanted more density. The ECR Specific Plan was started in response to the outcry at the poorly planned General Plan which allowed and encouraged high density the entire length of ECR. The city has seen fit to turn this around into a chance to pitch even more dense housing (without infrastructure or adequate planning). I do not believe you can have a "public meeting" where the public is not allowed to speak if they disagree. When I say proper planning, I mean; traffic, open space, parks, libraries, schools, water, fire, police, all the things we are now being made to pay for with marijuana taxes and bond measures.

Thank you,

I am a City of Santa Clara property owner and am writing to comment on the El Camino Real Right-of-Way Project.

I believe it is a mistake to get rid of on street parking at this stage of community development. I think the bike lane idea is great, but please don't eliminate on-street parking.

Someday, when on-street parking is not utilized, you can always convert it to another traffic lane or something else. However, until then, getting rid of parking doesn't "encourage" people to take the bus; instead, it just irritates them as public transit is not a realistic substitute for individual car ownership and driving in our local region.

I appreciate that in 10 or 15 years self-driving cars will taxi everyone around and at that point perhaps you can get rid of on-street parking. There is a simple test to figure out when that day has arrived: it will be the day when 90% of City employees and council members no longer drive in the City because they carpool, take Uber, or find some other non-individual-car ownership method of accomplishing their daily tasks of living. In my experience, when the people who make policy find themselves having to adjust because the detriment the policy bring to others is fully experienced by them, it may well be that the policy is reasonable.

1750 CATHERINE ST
SANTA CLARA. CA.95050
DECEMBER 5, 2018

SUBJECT: EL CAMINO REAL RIGHT-OF-WAY
COMMUNITY MTG. DEC.13,2018

DEAR COUNCIL MEMBERS:

I AM WRITING YOU ON THIS SUBJECT BECAUSE I WILL NOT BE ABLE TO ATTEND THIS MEETING. SO YOU WILL KNOW WHO I AM, HERE IS A BRIEF RECAP--I MOVED TO SANTA CLARA WITH MY PARENTS IN 1953, 65 YEARS LATER I AM STILL HERE.

THE BRIEF RECAP YOU DID ON THE SURVEY #1 SHOWED THE BIGGEST CONCERN WAS TRAFFIC CONGESTION. I DOUBT THAT HAS CHANGED. APPARENTLY THE POWERS IN CHARGE AGREED AND SHOWED IT BY INSTALLING DUAL LEFT TURN LANES AT SAN TOMAS AND EL CAMINO.

THE DISTANCE FROM LAFAYETTE TO SLIGHTLY BEYOND LAWRENCE EXPY. IS APPROX 3.1 MILES. AT THIS TIME THERE ARE 3 LANES IN EACH DIRECTION FOR TRAFFIC GOING EAST AND WEST. TO REDUCE THE LANES TO TWO IN MY OPINION WOULD CREATE MORE TRAFFIC CONGESTION.

LANDSCAPING WOULD DO NOTHING TO ALLEVIATE CONGESTION. SORRY FOR MY IGNORANCE BUT I HAVE NO IDEA WHAT YOU MEAN BY "PORK CHOP ISLANDS". WIDENING THE MEDIAN WOULD SIMPLY TAKE MORE SURFACE AREA AWAY FROM THE TRAFFIC LANES AND BIKE LANE. NARROWING TRAFFIC LANES TO ACCOMMODATE A BIKE LANE COULD POSSIBLY CREATE FENDER BENDERS. TRAVELLING AT 35 TO 40MPH IT DOESN'T TAKE MUCH OF A MOVE OF THE STEERING WHEEL TO FIND YOUR VEHICLE ENCROACHING ON THE CAR NEXT TO YOU.

AS FOR "REMOVE ON STREET PARKING", I WONDER HOW MUCH EFFECT THIS WOULD HAVE ON THE SMALL BUSINESSES ALONG THIS 3.1 MILE PART OF EL CAMINO.

LIKE IT OR NOT IN TODAY'S WORLD THE MAJORITY OF DRIVERS ARE TRYING TO GET FROM POINT A TO POINT B AS QUICKLY AS POSSIBLE AND SOMETIMES ANGER WITH TRAFFIC CONGESTION CAN EFFECT A DRIVER'S ATTENTION SPAN.

SO LETS MAKE CERTAIN THAT WE ARE MAKING CHANGES THAT WILL HELP DRIVERS REMAIN SAFE FROM HARM.

YOURS TRULY,

A handwritten signature in black ink, appearing to read "Robert Kopp". The signature is fluid and cursive, with the first name "Robert" and the last name "Kopp" clearly distinguishable.

Subject: development in Santa Clara and along El Camino

Hi there planning commission:

I wish the people who actually *live* in Santa Clara got to vote on stuff like this. My solution is simple, even though you won't like it.

No new high density housing. Not in my backyard, not in my neighborhood, not in my city.

I've been a resident of Santa Clara for almost 20 years, and what I've seen here is abhorrent to me. There is the new high density housing at the NE corner of Monroe at Lawrence Expressway, the smaller development at Warburton and Lawrence Rd. The new development at the NE corner at Kifer and Lawrence, and the huge new development at the SE corner of El Camino and Lawrence. Abhorrent, I tell you. Repugnant, disgusting, and totally not wanted or needed. You're trying to turn Santa Clara in downtown San Francisco, and I: Don't. Like. It. More people, more crime, more pollution, more water use, more carbon footprint, more cars, and more traffic. You can talk about per capita all you want, but more is *more*!

I used to think that I'd want to retire in Santa Clara. The tree lined streets, the quiet neighborhoods, the low crime. But not any longer. I have come to find out the more than one neighbor in my neighborhood has had their houses broken into within the last few years. I have seen posts of people accosted walking home on Nextdoor.com. And I've had my parked car vandalized outside our house. More people equals more of everything that's bad about suburban living, and you're trying to turn it into urban living. That's disgusting. Allow me to reiterate:

No new high density housing. Not in my backyard, not in my neighborhood, not in my city.

More people equals more crime, more pollution, more water use, more carbon footprint, more cars, and more traffic. You can talk about per capita all you want, but more is *more*!

Please take my viewpoint into account when you talk about even more high density housing. Santa Clara should be more like Cupertino and Palo Alto, and limit growth.

Thanks for your time,
Kevin Brown.
Santa Clara resident since 1999.

Good Evening. My name is David Murdaugh, and I am the owner of Grand Prix Powersports at 2360 El Camino Real in Santa Clara. I am here to voice my concerns regarding the removal of on-street parking on El Camino Real.

If this proposal were to come to fruition, we and other businesses would be severely impacted. We rely on on-street parking for customer service and access, without which we would not be able to operate. Because of restrictions placed on New Motor Vehicle dealers by the State of California, we are unable to move our dealership to another location within the distance allowed. This would leave us with no option other than closing our dealership that has been on El Camino Real for 50 years and in which I have invested 35 years and my life's savings.

The negative economic consequences would be significant. Not only would 14 good men and women lose their full-time jobs by which they support their families, but local and State revenues would be affected. We collect over \$500,000 per year in Sales Taxes, nearly half of which goes to fund local public safety and criminal justice activities, local health and social services programs, and local transportation projects.

We strongly object to any modification that eliminates the currently available on-street parking on El Camino Real.

Planning Department

Re: Objection to Removal of On Street Parking – El Camino Real

Dear Planning Department,

Our office represents commercial Golabi Properties, LLC (Golabi). Golabi has invested significant funds to acquire and maintain commercial property located on El Camino Real in the City of Santa Clara.

We are in receipt of a Notice of Community Meeting set for December 13, 2018 to review right of way alternatives including Minor Modifications to median, traffic lanes, landscaping and arterial islands at intersections, as well as Minor Modifications to Remove On-Street Parking to accommodate a protected bike lane.

Please be advised that we are unable to attend the meeting in person. However, our client has authorized our delivery of this notice to you, for presentation at the meeting. Business interests located on El Camino Real rely on on-street parking for customer service and access. Removal of on-street parking will have a significant detrimental effect on business interests and severe economic consequences.

Golabi hereby objects to any Minor Modification that will serve to diminish or eliminate on-street parking currently available on El Camino Real in Santa Clara.

Sincerely,

Greg Close
Asset Manager for Golabi Properties, LLC

I do not agree with building higher buildings. I want more landscaping on the street. What is the plan to accommodate for the higher traffic? Are the builders putting money toward street maintenance & improvements. Dense housing with no retail & convenience stores detracts from revenue to the city. we need both.

Comment Card

I believe some high density housing options are necessary, but I don't want to see high density everywhere or too continuously! It is better if high density can be kept to three or four stories, along major thoroughfares, like El Camino Real, too.

EL CAMINO REAL SPECIFIC PLAN

Workshop #2

Comment Card

HAWK signals are confusing but effective. Los Padres, Pomeroy, San Tomas Creek Trail and prospective Calabazas Creek Trail are major bike corridors. Pay special attention to crossings, placemaking.

Protected bike lanes are necessary here, to correct very bad safety records. Please think through conflicts with buses, bus boulevards, and intersections.

Please think ahead about cleaning & maintaining protected bike lanes, so they don't end up full of trash cans, loading zones, debris, etc.

Comment Card

① How will you ensure the road surface is maintained appropriately with the extra traffic? The state is responsible today and the condition of the road surface is horrible.

② For transportation impact plan, consider impact to small driveways close to El Camino (private roads) such as Cozumel Circle (at Bowers). It is already hard to turn in & out with traffic backup on Bowers. Fewer lanes on El Camino can cause more backup on side roads.

BEFORE ALLOWING PEOPLE TO VOTE, YOU SHOULD MAKE SURE THEY LIVE IN SANTA CLARA. THERE WERE A FEW "BALLOT STUFFERS" FROM OTHER AREAS I SPOKE WITH TODAY. YOU SHOULD TRY TO GET THE OPINIONS OF PEOPLE WHO LIVE HERE, NOT THOSE WHO JUST THINK SOMETHING SOUNDS GOOD, BUT WON'T HAVE TO LIVE WITH IT.

EL CAMINO REAL SPECIFIC PLAN

Workshop #2

Comment Card

With respect to neighborhood transition, for the development on the north side ECR, a 45° elevation is going to cast shadows on the property behind the building, especially in winter. The sun is below 45° at noon from about October to February or March. If I was a property owner here, I would be upset. May consider lowering the elevation angle for the north side of ECR.

EL CAMINO REAL SPECIFIC PLAN

Workshop #2

Comment Card

This is my first time here (my fault) one} 90% of the time there is never enough parking. The problem that is the main point, access into and out of the developments either it stalls traffic not visiting the development going into the facility or the merging cross lanes leaving the facility.

EL CAMINO REAL SPECIFIC PLAN

Workshop #2

Comment Card

With the larger developments is it possible to dedicate the ~~the~~ Right lane just for that to reduce the grid lock of clock work customers. Going in and out of multiple entrances and exits.

Labeled on the street itself.

It can not be any more confusing than the pedestrian crosswalks with the red lights and red flashing lights. Can you proceed when their flashing or do you wait till the red light disappears? El camino does have 3 lanes.

Shouldn't they have had these workshops about 5 years ago before they started turning the El Camino into apartment row . Seems like they are trying to cover their ass and make it seem like the public can be involved , but let's be real . They have approved just about everything that has been presented to them, no matter how it affects the area , and it's a little late to start making a plan now . Hundreds of empty over priced apartments' traffic everywhere and no where to shop or eat . I went to alot of council meetings where the public opposed a project and the council acted like they were listening and then they passed it anyway . Great job city council .

To: Maria Le
Subject: RE: Public Comment ECR

No, things are not set.

City staff was directed by Council to develop a plan because there were many projects coming forward with little direction provided by existing policies. The Council felt that there should be more specific goals, policies, and guidelines for new development on ECR.

Any new development, that is not already permitted or one of 5 applications that were on file at the start of the process, will be required to conform to the plan once adopted by the City Council.

Subject: El Camino Real Community Workshop #2 - Help us shape the future of the El Camino Real

Hello Lesley,

Maria linked me to you, regarding El Camino Real public input. I'm not entirely sure what the questions are yet, but here's my input:

- * Zone everything for flexible use residential & retail & clean-office, so that people don't have to drive so far, and so that space can be repurposed from residential to commercial (etc) as local demand varies.
- * Stop building residential complexes without matching green-space.
- * Enforce rules at shared parks, to prevent "tragedy of the commons", like off-leash dogs & homeless people.
- * Physically separated bikeway

--Chad

EL CAMINO REAL SPECIFIC PLAN COMMENTS

WITH PHOTOGRAPHIC EXHIBITS ATTACHED

BY: Mr. B. Donoghue

INTRODUCTION

THE FOLLOWING SPECIFIC COMMENTS ARE A SERIES OF IMPRESSIONS DEALING WITH MY YEARS OF TRAVELING ALONG THE EL CAMINO REAL. THE LOCAL CITIES OF CONCORD AND CUPERTINO HAVE DESIGNED AND CONSTRUCTED MAJOR BOULEVARD STREET TREE IMPROVEMENTS THAT OFFER THE PUBLIC A PLEASANT WELL DESIGNED AND CONTINUOUS BOULEVARD WITH A SHADED SIDEWALK AREA WITHOUT THE HEAT ISLAND EFFECT. THE TREES HAVE BEEN WELL MAINTAINED TO INSURE NORMAL GROWTH.

THE EL CAMINO REAL WILL HAVE TALLER BUILDING STRUCTURES THAT DEMAND VISUAL SCREENING AND PROTECTION FROM THE SUN. THE STREET SCAPE WILL NEED STREET LIGHTING PHOTOMETRIC MINIMUM AND MAXIMUM STANDARDS WHICH WILL CREATE AN INVITATION TO THE PUBLIC TO USE THE SIDEWALKS.

REVIEW OF EXISTING LIGHTING AND POLES:

A. NEW DECORATIVE LIGHTING POLES AND FIXTURES:

- 1. SOME ARE MISSING AT NEW BUILDINGS**
- 2. IRREGULAR SPACING EXISTS AT RANDOM LOCATIONS**
- 3. REAR LOWER LUMINAIRE IS MISSING AT RANDOM LOCATIONS**
- 4. OLDER ALUMINUM POLES ARE EXISTING AT LOCATIONS**
- 5. NEW DECORATIVE POLES PLACED AT CROSSWALKS IN LIEU
ALUMINUM POLES WITH LONG ARMS AND WITH HIGHER
INTENSITY AND BETTER PERFORMING LED LUMINAIRES**
- 6. NEW SINGLE LUMINAIRE POLES WITH STANDARD ON CENTER
SPACING PROVIDE 0.7+/- foot-candles(ftcds) AT CENTER OF SPACING
AT REAR OF SIDE WALK**
- 7. NEW DUAL LUMINAIRE POLES WITH STANDARD ON CENTER
SPACING PROVIDE 0.9 ftcds AT CENTER OF DUAL
LUMINAIRE SPACING AT REAR OF SIDEWALK**
- 8. NEW DUAL LUMINAIRE POLES PROVIDE 2.6 ftcds AT 10'
FROM EITHER POLE AT REAR OF SIDEWALK**
- 9. PHOTOMETRICS AND THE FIXTURE MANUFACTURE AND CATALOG
NUMBERS WERE NOT AVAILABLE FROM THE CITY**

REVIEW OF EXISTING LIGHTING AND POLE CONDITIONS (continued)

B. OLDER POLES

- 1. SIGNAL POLES HAVE RANDOM(short and long)LUMINAIRE ARM LENGTHS ALONG EL CAMINO REAL AND THE SIDE STREETS AND “T” INTERSECTIONS**
- 2. INTERSECTIONS AND CROSSWALKS HAVE DIFFERENT LUMINAIRE POLE LOCATIONS ALONG THE WIDE EL CAMINO REAL**
- 3. INTERSECTIONS AND CROSSWALKS HAVE DIFFERENT TYPES OF LUMINAIRES AND DIFFERENT PHOTOMETRIC PATTERNS OF LIGHT AND DIFFERENT TYPES OF LIGHT**
- 4. LIGHTING LEVELS VARY AT THE FACE OF CURBS FROM 0.2 foot-candles(ftcds) to 2.6 ftcds AT CROSSWALKS**
- 5. LIGHTING LEVELS VARY AT THE CENTER OF EL CAMINO REAL CROSSWALKS FROM 0.3 ftcds TO 2.3 ftcds**
- 6. LIGHTING AT BUS STOPS VARY AND MOST ARE DIM_(STANDARD UNKNOWN)**
- 7. LIGHTING AT SIDE STREET CROSSWALKS IS DIM AND NONSYMMETRICAL**
- 8. LIGHTING AT SIDE STREET CROSSWALKS IS NOT FROM AN LED LUMINAIRE ON A LONG ARM**

C. OTHER

- 1. STRIPING AT CROSSWALKS ALONG EL CAMINO REAL
IS VERY WELL WORN**
- 2. STRIPING AT “HAWK” INTERSECTIONS IS EASILY SEEN**
- 3. “HAWK” SIGNALS ARE CONFUSING AND ATYPICAL,
AND HAVE A LACK OF INFORMATIONAL SIGNS.
THE LAW REQUIRES A FULL STOP AT A BLANK SIGNAL SYSTEM,
AND A FULL STOP UNTIL A CROSSWALK IS COMPLETELY CLEAR
OF PEDESTRIANS**
- 4. THE LED SIGNAL FACES APPEAR TO BE TOO BRIGHT AFTER DARK,
AND IT APPEARS SOME SIGNAL FACES ARE NOT LEDS**
- 5. THE LIGHTING DESIGN AT THE SAINT CLARA STATUE IS DIM AND THE
LIGHT IS SPOTTY.**

REVIEW OF EXISTING TREES WITHIN EL CAMINO REAL:

A. NEW STANDARD TREE(Acer Rubrum Armstrong)

- 1. NEW STANDARD TREES WITHIN THE SIDEWALK ARE MISSING
AT SOME NEW BUILDINGS**
- 2. PALM TREES ARE BEING PLANTED WITHIN NEW SIDEWALKS
AT SOME NEW BUILDINGS**
- 3. NEW TREE SPACINGS ARE NOT UNIFORM AT SOME LOCATIONS**
- 4. ORIGINAL IRRIGATION DESIGN AND CURRENT MAINTENANCE
EFFORTS ARE UNKNOWN**

B. OLDER TREES

- 1. EXISTING OLDER TREES GROWTH HAS BEEN STUNTED AND
THEY ARE TOO SHORT, BLOCKING VIEWS OF STOREFRONTS**
- 2. THE SPACING AND LOCATIONS ARE IRREGULAR**
- 3. SOME LOTS ARE MISSING TREES**
- 4. ONLY A FEW TREES ARE AS LARGE AS THE SPECIES
GUIDELINES STIPULATE**
- 5. MOST EXISTING TREES DO NOT OFFER SHADE AND SCREENING ABOVE 12'**

REVIEW OF EXISTING TREE ALONG EL CAMINO REAL (CONTINUED)

C. PALM TREES

- 1. PALM TREES HAVE BEEN PLANTED ON THE SOUTH SIDE AND ARE TOO TALL TO PROVIDE AN ATTRACTIVE STREET SCAPE**

D. ON-SITE TREES AND LANDSCAPING

- 1. NARROW PLANTING LANDSCAPE SETBACKS BEHIND SIDEWALKS HAVE BEEN USED TO PLANT PALM TREES IN LIEU OF STREET TREES THESE TREES ARE TOO TALL AND LARGE TO OFFER ANY CONSTRUCTIVE VISUAL PRESENCE WITHIN THE BUILDING FAÇADE, AND WILL RUB AGAINST THE BUILDING AND THEIR NEW BALCONIES**
- 2. LIMITED SHRUB SPACINGS HAVE BEEN ESTABLISHED, AND THESE ARE TOO SMALL AND DO NOT SOFTEN THE BUILDING'S FAÇADE**

REQUESTS FOR REVIEW BY EL CAMINO REAL SPECIFIC PLAN COMMITTEE

- A. CREATE A BASE PLAN FOR UNDERGROUND UTILITY FACILITY CONFLICTS**
- B. CREATE A REVISED PLAN FOR EL CAMINO REAL THAT OUTLINES THE FOLLOWING:**
 - 1. PLANTING OF STANDARD ADOPTED ACER TREE IN ALL AREAS ALONG EL CAMINO REAL IN SIDEWALK OR STREET OR IN WIDENED BUILDING**

REQUESTS FOR REVIEW BY EL CAMINO REAL SPECIFIC PLAN COMMITTEE(CONTINUED)

- 2. REQUIRE ALL STREET LIGHTS TO BE OF THE DECORATIVE TYPE**
- 3. REQUIRE REPLACEMENT OF STUNTED TREES AND TRIMMING OF STREET TREES OBSCURING RETAIL SIGNAGE AND REMOVAL OF POORLY LOCATED STREET TREES**
- 4. REQUIRE ALL CROSSWALKS TO BE ADEQUATELY ILLUMINATED TO AN ADOPTED DESIGN STANDARD. ALONG EL CAMINO REAL AND INTERSECTING SIDE STREETS**
- 5. REQUIRE ALL ADJOINING NEW BUILDINGS TO PROVIDE LIGHTING DESIGNS FOR SIDEWALK AREAS. REQUIRE NO DIRECT GLARE INTO STREET AREA**
- 6. REQUIRE IMPROVED CHRISTMAS LIGHTING AT MEDIAN TREES AND GENERAL LIGHTING AT THE STATUE OF SAINT CLARE**
- 7. REQUIRE ALL TREES BE WATERED AND MAINTAINED EFFECTIVELY AND CONTINUALLY**
- 8. INVESTIGATE THE HEAT ISLAND EFFECT AND COMMENT THE LOWERING OF DAY TIME AIR TEMPERATURES BY 4 DEGREES AND NIGHT TEMPERATURES BY 22 DEGREES DUE TO TREE SHADING AND RESPIRATION**

Subject: EL CAMINO REAL SPECIFIC PLAN- LIGHTING

Ms. Xavier,

Again, thank you for your discussions concerning the implementation of the Specific Plan's recommendations during Workshop #2.

I have contacted the Traffic department and the Silicon Valley Power department concerning the existing conditions at crosswalks and intersections along ECR. My perception is the City manager failed to include intersections in the decorative lighting project a few years ago. Decorative poles have been installed at intersections and crosswalks. The light distribution from these poles and the lack of long armed poles at signal equipment and crosswalks has left the Real a dangerous place at night.

The Specific Plan identification of these needed upgrade areas, I hope, will be mentioned and a funding plan outlined. However, it is my belief the two mentioned City departments should fund the prompt upgrading of some of the intersections. I request this approach of funding be reviewed by the Plan and the City.

Subject: EL CAMINO SPECIFIC PLAN MEETING

Ms. Xavier,

The meeting last night was very informative. Thank you for the discussions and inserting a Public comment period.

My comment package was reviewed by the Consultant, however his limited comments and wall information sheet caused me to create this email.

He stated that the lighting subject was not within his knowledge base, and as no statement on the wall sheet addressed the following issues, I am concerned.

Issues:

1. The establishment and publishing of standards for minimum sidewalk illumination levels. and a maximum/minimum illumination ratio.
2. The establishment and publishing of a standard for minimum crosswalk illumination levels and maximum/minimum illumination ratio. A standard for the location of these poles and luminaire arm lengths is also needed.
3. A comment on the existing median tree lighting and the illumination of the Saint Clare statue area
4. A maximum illumination standard and for *direct glare* on to the street area. Signage illumination standards and sign locations zones and size was also not mentioned.
5. A standard for illuminated cross street name signage.

The inclusion within the report of cost estimates, funding sources, and improvement schedules for needed City up grades to City facilities to comply with the Specific Plan recommendations is a vital report section. In other words there are areas that will not develop for decades and local areas that need tree and lighting upgrades and work. These areas will degrade any new work that new developments will accomplish. There are also areas of recent completed developments that need their frontages reworked to comply with their approved plans and the new Specific Plan guidelines. The City needs to understand for the guide lines to work and upgrade the Real the City must play its independent part and invest in the Real. This work should be funded by local Improvement District assessments, bonds or in some cases department budgets(change in a luminaire and arm at isolated locations).

The discussions of trees also appeared very limited. The power point exhibits showed many tree heights and locations along the Real. The inclusions of tree standards and types, irrigation and maintenance requirements and the relocation and planting of existing problem trees should be identified. It appears the Consultant is limiting his report to a few identified areas and not providing a master plan for the long term improvement of the Real. You might argue that this is beyond his Scope of Work, however it is a necessity. The inclusion of a utility conflict master plan was great. The integration of tree planting zones planting options where conflicts occur is a basic Specific Plan requirement, in my view.

Thank you again for the discussions and keep up the good work.

Mr. B. Donoghue

PS The HAWK crosswalk beacon system seems to be criticized at most all the various recent meetings I have attended

Sorry, one more comment.

With all the new construction, why not require it to be LEED certified and also use as much solar power as possible, not only for electrical, but for heating, also. This would possibly increase the initial costs, but it is shown to reduce the long term operational costs.

Subject: El Camino Real planning

I was at the ECR Specific Plan meeting last night at the library, but had to leave early because of health reasons. However, I have a few comments, one of which I left at the desk.

However, before I give my specific comments I would like to make the general observation that I believe, done right, high density housing is what is needed for the valley. Many folks say this lowers life quality, but I disagree, in fact, I see where it can bring people together.

1. With respect to the transition, for those buildings on the north side of El Camino, a 45 degree angle will block the sun for those residences behind those buildings. At noon, the sun is not above 45 degrees from around mid October to mid February. It is worse for times earlier and later in the day. If I was a resident in one of these homes, I would be greatly upset about this.
2. The traffic maps do not even show the bike / pedestrian path along San Thomas / Saratoga Creek. From my experience, this path is well used by not only people walking and riding for pleasure and health, but also by commuters to the high tech companies in northern Santa Clara. This needs to be more emphasized in the planning and methods to allow easy and safe passage from the sidewalks and bike paths along ECR to this path needs to be designed into the plan. I think we need to encourage bicycling as a major form of transportation for all of the new residents who will be living along ECR.
3. Automobile traffic: It would be good to know what the rates and patterns are for the current and future expected automobile traffic along ECR versus time of day, day of week, etc. A significant effort needs to be done in modeling this traffic using computer models and this needs to be presented to the citizens who live in Santa Clara. We do not want another fiasco like what has happened to those who live around the stadium during game days. This is not only not fair the current citizens, but will impact how well the development will

be received by future residents. Remember, Santa Clara has a reputation for doing dumb things, like previously demolishing the downtown, resulting in a Santa Clara without a there there.

Thank you

Joe Rich
