On June 5, 1990, the California electorate passed Proposition 111 which modified the method of adjusting the annual appropriations limit. Beginning with the 1990/91 Appropriations Limit, the City may choose from one of the following indices when determining the adjustment factor:

The annual growth in the City's population *or* the annual growth in the County's population as provided by the State Department of Finance.

*and*

The annual growth in the California Per Capita Income *or* the growth in the non-residential assessed valuation due to new construction within the City.

The 1990/91 Appropriations Limit was revised by applying the new growth factors to the appropriations limits for 1986/87 and each subsequent year. In computing the FY 2019/20 Appropriations Limit, the population growth of the County of Santa Clara and the annual growth in California Per Capita Income was used.
