Annual Evaluation Report for FY19 (Year 4)

(July 2018 to June 2019)

Santa Clara County 2015 Multi-Jurisdictional Program for Public Information (PPI)

Revised to reflect updated logos for City of Sunnyvale and Valley Water

June 2019

POST MEETING MATERIAL

I. INTRODUCTION

Ten cities and the Santa Clara Valley Water District (Valley Water) have been active participants in the National Flood Insurance Program's (NFIP) Community Rating System (CRS) for almost 20 years. CRS is a voluntary program of the Federal Emergency Management Agency (FEMA) NFIP that allows participating communities to earn flood insurance premium discounts for their residents and businesses by agreeing to adopt and enforce practices that meet or exceed FEMA's requirement to reduce the risk of flooding. As the flood risk reduction agency for Santa Clara County, Valley Water performs many flood-related outreach and maintenance activities that earn CRS points for the County's CRS-participating communities. Flood insurance premiums for participating communities are reduced in 5% increments for every 500 CRS points earned. The total savings for Santa Clara County residents from CRS discounts last year was approximately \$2.2 million.

The *CRS Coordinator's Manual, 2013 edition*, included the option to undertake a Program for Public Information (PPI) which is a method to customize flood risk reduction outreach messages and increase CRS points. Valley Water hosted a meeting to facilitate the development of a Multi-Jurisdictional PPI in 2013 and 2014 so that all Santa Clara County CRS participating communities could work together and benefit from this activity. This PPI was finalized in April 2015. This Annual Evaluation Report (Report) is the fourth Report to document our PPI activities.

The number of CRS points that will be earned by the PPI are determined by FEMA's auditors that are in the Insurance Services Office (ISO). We estimate that of the possible 350 points, we could earn up to 300 points per participating community for our PPI efforts. The complete list of outreach projects is included as Attachment 1 of this Report is Appendix A, listing all projects proposed in the 2015 PPI, with a "Project Accomplishments" column noting actions taken during the fourth year of the PPI, FY19.

One important benefit from our PPI work has been the close collaboration between city staff who work on flood protection throughout the County. Together, we continue to strengthen not only our individual CRS programs, but also the Santa Clara County CRS Users Group (CRS Users Group). We have learned from one another about shared floodplain management activities, including flood protection and land use issues. For the CRS Users Group, the PPI is our most important project. In addition to the PPI, the CRS Users Group also learned about new FEMA maps that are being updated to reflect coastal flooding in the San Francisco Bay area. A sub-group of shoreline communities worked together on improved maps as part of this process. The CRS Users Group and the PPI effort provided a forum for the advancement of flood protection issues throughout the County. Twelve agencies initially participated in this Multi-Jurisdictional PPI; nine have approved it. We will continue to actively encourage more participation.

II. PPI DEVELOPMENT PROCESS

Valley Water initiated the PPI process for Santa Clara County in November 2013. Valley Water hosted the process and provided staffing, while each participating community was required to: (1) conduct the CRS Self-Assessment; (2) recruit a non-governmental external stakeholder; (3) participate in the PPI Committee meetings; and (4) bring the PPI to their elected body for approval. With the enthusiastic support of the CRS coordinators, the PPI process was started.

A number of meetings were held in 2013 and 2014 to develop the PPI. A committee worked between the meetings to draft the PPI and compose the extensive list of possible projects (*Attachment 1, which is Appendix A of the 2015 PPI*). Table 1 shows dates of approval of the PPI by each participating agency as of June 2019. Nine agencies have approved; San Jose, Cupertino, and the County of Santa Clara are still pending approval.

Agency	Date of Approval	Approved	Not Scheduled
Santa Clara Valley Water District	4/14/15	X	
City of Cupertino	Pending		X
City of Gilroy	11/21/16	X	
City of Los Altos	6/23/15	X	
City of Milpitas	1/19/16	Х	
City of Morgan Hill	8/24/16	Х	
City of Mountain View	10/27/15	X	
City of Palo Alto	6/8/15	X	1. N
City of San Jose	Pending		X
City of Santa Clara	7/14/15	X	
Santa Clara County	Pending		X
City of Sunnyvale	6/23/15	X	
Total Approved		. 9	
Not Yet Scheduled			3

Table 1. Dates of PPI Approval

III. PPI ACCOMPLISHMENT FOR FY 2019

The PPI accomplishments for FY19 fall into three categories. The first was continuing to get the PPI approved by the governing bodies of the participating communities. The second was to continue to implement our tracking system to monitor the PPI projects. The third was carrying out an extensive outreach program for flood risk reduction.

<u>Elected Body Approval</u>: Including Valley Water, nine of the 12 participating agencies had the PPI approved by their governing body by the end of FY19. The approval dates are shown by city/agency in Table 1. The City of San Jose, City of Cupertino, and the County are each still pending approval.

<u>Accounting System</u>: Because the 2015 PPI included up to 12 agencies, tracking implementation became quite cumbersome compared to a single agency PPI. Valley Water continues to oversee the record-keeping to ensure consistency throughout the County. An electronic file-sharing system, Egnyte, was initially set-up with folders for each of the agencies to file documents related to the 83 potential outreach projects identified in the PPI, including a comprehensive spreadsheet showing which projects were accomplished in any given fiscal year, by community/agency. This spreadsheet, along with the Annual Evaluation Report, will be submitted with annual CRS recertifications. PPI-related projects carried out by Valley Water usually apply to the entire county. Cities carried out projects in addition, and they are shown on the composite spreadsheet which includes input from each city.

At the February 25, 2019 CRS Users Group Meeting, the committee discussed the status of the cities' Egnyte usage. We discussed the benefits of using the system for tracking PPI outreach projects and also identified the benefits of restructuring the file system so that all CRS related documentation, including the 2015 PPI projects, could be tracked. The benefits are:

- <u>Information Share/Knowledge Transfer</u>: Communities can view each other's program documentation. When a community improves its CRS rating, another community can access the documents submitted to determine how the CRS credited activities helped improve the score.
- <u>Document Repository</u>: Central location for CRS-related documentation, organized to mirror the CRS Coordinator's Manual (by community/activity/element). This will be helpful for both CRS annual recertifications and cycle verification visits/audits, as well as when a community experiences staff turnover.

Summary of PPI Projects Accomplished in FY19

Appendix A from 2015 PPI noting FY19 Project Accomplishments Worksheet (Attachment No. 1) is summarized as follows:

- Of the 49 Community at Large Outreach Projects (CAL OP) identified in the PPI, at least 48 were accomplished. Three Outreach Projects related to the Winter Preparedness briefing were eliminated because the briefing is not an outreach open to the public.
- For Outreach Projects in the Special Flood Hazard Area (SHFA OP), at least 20 of the 22 potential projects were accomplished.
- Of the 9 Targeted Audience Outreach Projects (TA OP) identified, 8 were accomplished.

These numbers go well beyond the requirements of the CRS Program, and we anticipate collecting the maximum number of points for our collective efforts in FY19.

Outreach Program

Valley Water's campaign theme for the 2018-19 flood awareness campaign was "Climate Changed." It launched shortly after the Fourth National Climate Assessment was published; there could not have been a better time to have this conversation. The federal report assessed intense extreme weather and climate-related events are becoming more frequent and will have catastrophic impacts on vulnerable communities, infrastructure, ecosystems and our economy. Extreme storm events could result in more frequent and severe flooding in our region. Valley Water's message emphasized our commitment to reducing flood risks and protecting the community but acknowledging we cannot eliminate all risks. Thus, we must adapt and we must prepare. And it starts with being informed and aware of risks.

Our community outreach efforts were supplemented by an educational paid advertising campaign. This year, our advertising campaign was supplemented by a series of formative research to truly understand our target audience, its level of awareness, and explore what educational messages and images most appealed to the group.

The overall campaign cost was approximately \$335,000 which included creative and production costs, a media buy of \$201,000, the floodplain mailer production and distribution costs of \$32,000 and a post-campaign survey.

The flood awareness paid advertisement campaign ran over a 5-month period from mid-November 2018 to mid-April 2019. The total cost of the paid advertisement campaign was \$201,355. The paid media campaign served a total of 34,808,684 impressions, up from impressions in 2018 at 21,815,542.

Community Events:

Valley Water staff made a concerted effort to actively participate in community events, including community festivals and emergency preparedness affairs, particularly in communities and neighborhoods in or close to flood zones. In 2018, both Valley Water and City staff participated in 19 community events during which information on flood safety and emergency preparedness materials (including the floodplain mailer) were shared.

During the 2018-19 Fiscal Year, Valley Water gave 13 speaker's bureau presentations with an emphasis on flood protection and flood safety to organizations and agencies that requested presentations. Three of these presentations were made at neighborhood association leadership groups and targeted to regions in vulnerable flood zones. The presentations focused on specific flood risks for these areas.

<u>Advertising Campaign</u>: The paid advertisements began in mid-November 2018 and ran through April 2019. In preparation for the campaign, as early as September 2018, Office of Communications staff led social media and digital communication efforts to convey flood safety messages including the use of Facebook, Twitter and blog posts, as well as Valley Water's e-newsletter. A key strategy of the paid campaign was to incorporate key PPI messages in our ads as much as possible. These messages were derived from Valley Water's annual Flood Plain Notification mailer, a publication distributed to residents in FEMA designated floodplains (Attachment 1 - Special Flood Hazard Area [SFHA] Outreach Projects [OP] 1 and 3).

<u>Customer Target</u>: The campaign was targeted to residents and commuters within Santa Clara County, and residents in areas in or near a Special Flood Hazard Area. These targeted areas were determined using zip codes from the floodplain mailer address list, which is based on published FEMA flood maps.

Media: The media breakdown was as follows:

- a) Radio 34 percent
- b) Print 33 percent
- c) Online 12 percent
- d) Outdoor 13 percent
- e) Collateral (Floodplain Notification mailer) 8 percent

<u>Radio</u>: (34 percent)

Scripts for the radio emphasized the campaign theme message of adapting and preparing for extreme weather because of climate change. Weather alerts were also produced to include short tips for taking action before or during a storm. These included key PPI messages such as making an emergency plan or getting sandbags. The weather alerts were tied to a forecast throughout the season and ran during weather and traffic segments.

The radio buy included 1,135 spots of both :15 weather alerts and :30 campaign spots in four languages: English (KBAY and KRTY), Spanish (KBRG), Vietnamese (KVNN Radio Saigon), and Chinese (Mandarin) (KSQQ). The weather alerts for the KRTY and KVNN buys were all bonus. The Pandora buy featured a banner ad along with the weather alerts and campaign spots running via mobile.

Total Radio Ads: 1,135 spots Total Radio Impressions: 7,690,142

Print: (33 percent)

The print buy utilized publications providing the greatest reach within each ethnic and general population. Community papers were also targeted to reach some of the smaller communities in different cities. Full or half page ads were placed in English (*Mercury News, Metro Weekly News, Palo Alto Post, Morgan Hill Times, and Morgan Hill Life);* Spanish (*El Avisador and El Observador*); Chinese (*World Journal News; and* Vietnamese (*Cali Today*).

Publications were weekly (*El Avisador, El Observador, Cali Today, Metro Weekly News, and Morgan Hill Life*); bi-weekly (*Palo Alto Post and Morgan Hill Times*); and daily (Mercury News and World Journal News), with a special edition of a yearly publication for *Cali Today* being placed in their *Tet Magazine* provided as bonus. The buy also included paid and bonus banner ads on *El Observador* and *Cali Today's* websites.

In addition, several cities published information through utility bill inserts.

Total Print Ads: 53 Total Print Impressions: 10,501,141

Online: (12 percent)

The online buy included banner ads on Facebook, Comcast and Google AdWords in English, while the Adtaxi buy ran creative in all four languages. Facebook ads were delivered via the sites' newsfeed for desktop and mobile to audiences in two groups – SCC home and business owners ages 30 and up, and SCC renters and business owners ages 19 and up. The targeting interests were weather alerts, flooding, emergency preparedness, and flood insurance. Google AdWords engaged audiences living in flood zones, utilizing keywords similar to the Facebook interests and behaviors. Ads for these buys were geo-targeted to zip codes in flood prone areas.

Comcast ads were aimed at both homeowners or renters. The banner ads running via Adtaxi featured creative with similar targeting used with Facebook /AdWords delivering ads on various websites (i.e. People, Fandango) within its network. This portion of the buy generated 7,120,730 impressions and 16,510 clicks.

Total Online Sources: Four platforms (Facebook, Google Adwords, Adtax, Comcast) Total Online Impressions: 7,120,730

Outdoor: (13 percent)

Outdoor ads consisted of center stages, or "wraps" on Valley Transit Authority's (VTA) light rail cars as well as posters on VTA transit shelters.

Ads were placed on Center Stage lines that ran as close as possible to flood prone areas with creative featuring English ads. The transit shelters were placed in ten locations also in flood prone areas in the cities of San Jose, Palo Alto, Morgan Hill, and Santa Clara in English, Vietnamese, or Spanish. The media buy generated a total of 11,012,832 paid and 1,058,694 bonus impressions (due to ads remaining visible longer than anticipated).

Total Outdoor Ads: 16 Total Outdoor Impressions: 12,071,526

Digital Publications: (non-paid media)

Valley Water also uses its monthly newsletter, news blog and social media profiles to enhance flood awareness efforts before and during a forecasted storm as well as during the campaign season starting as early as September (to use National Preparedness Month to kick start the conversation). From September to April, we published six blog posts on flood preparedness efforts and resources, and highlighted flood safety topics in five of our monthly newsletters. This season, staff also created an instructional video that features Valley Water's Flood Watch Tool, a map-based instrument that helps residents check on the status of local streams in historically vulnerable and flood-prone locations. This video is hosted on Valley Water's Flood Ready pages, an online hub of flood safety resources.

During the length of the campaign and leading up to anticipated storm events, Valley Water posted flash flood warnings, and shared posts with key messages about flood safety, promoting the Flood Watch Tool throughout the winter. During the months of September through April, we featured 79 Facebook and 65 Twitter posts with flood safety messages.

<u>Results</u>:

Traffic to the flood protection resources page through the duration of campaign resulted in a total of 30,964-page views to both the flood protection resources and flood safety tip pages. During the campaign months, the flood protection resource page was the second most viewed page on the Valley Water's website.

The flood protection resources page serves as a hub of flood safety information with icons leading to a series of related web pages including information on flood zone maps, signing up for emergency alerts, sandbags, reporting local flooding and safety tips. Of these subpages, the most accessed was the flood zone awareness page, which features a brief explanation for determining if your home is in a FEMA designated flood zone. It also features an instructional YouTube tutorial for using FEMA's Map Service Center to identify one's flood risk.

IV. 2019 SANTA CLARA COUNTY CRS USERS GROUP MEETINGS – MONITORING AND EVALUATING THE 2015 PPI

Santa Clara County CRS Users Group (CRS Users Group) meetings were held on February 25, 2019 and May 29, 2019 to gather communities' input on project accomplished in FY19. Agenda and attendance sheets for each meeting are included as Attachments 2-5.

At the February 25th meeting, a draft PPI Annual Evaluation Report FY19 (Year 4) was distributed to the communities for their review and input.

As required by CRS, our February and May meetings were to monitor the implementation of the 2015 PPI outreach projects and to see if the desired outcomes were achieved, as well to determine if any changes to the PPI were needed. The Users Group agreed that our 2015 PPI messaging and projects would remain the same for the duration of the 2015 PPI, which sunsets in 2020.

We discussed lessons learned from our fourth year and which projects/messaging were important to continue, as well as strengthen. Attendance was good; staff from eleven agencies participated, as well as some external stakeholders and other interested parties.

At the February 25th meeting, Valley Water staff recapped the Santa Clara County CRS Users Group presentation made at the September 2018 Floodplain Management Association (FMA) Conference.

Valley Water Communications staff gave an overview of our 2018-2019 Flood Awareness Campaign, including the Floodplain Notification that was mailed in November 2018 to all addresses in the FEMA Special Flood Hazard Area (SFHA), as well as to City Managers, Public Works and Planning Directors, and city CRS staff in December 2018.

Valley Water gave a brief overview of our Map-Based Flood Watch Tool <u>https://gis.valleywater.org/SCVWDFloodWatch/</u>. This tool is very useful during flood events, and Valley Water encourages communities to utilize it.

The cities of Santa Clara and City of Mountain View shared their preliminary audit results. Under CRS Activity, 510 – Floodplain Management Planning, using the Santa Clara County's Local Hazard Mitigation Plan (LHMP) as their documentation submittal, preliminary indications show each city receiving 280 points out of a possible 382 points. We discussed other cities utilizing the LHMP as either part of an upcoming cycle verification visit or processing a modification, if appropriate, if it could result in improving their CRS classifications.

Also, the cities Santa Clara and Mountain View shared their experiences using our electronic repository filing system, Egnyte, during their respective cycle verification visits. Both communities had positive experiences and believed that using Egnyte facilitated their audits. (Post meeting, we learned that both cities' CRS classing rating improved).

Emergency preparedness starter kits were distributed to the county and all Santa Clara County cities. Valley Water reminded CRS communities that the kits are *starter* kits and not intended to replace comprehensive kits. Therefore, communities should remind the public that these are starter kits that are meant to be used as a starting point when developing comprehensive emergency kits.

Valley Water shared information on the Department of Water Resources (DWR) statewide agency coordination calls that kicked off on March 20, 2019. The calls will lead up to the 8th-annual 2019 California Flood Preparedness Week (CFPW) that will be held from October 19-26, 2019. We encouraged the CRS communities to participate this year and to forward the information to their communication teams. (After the Users Group Meeting, Valley Water requested DWR's approval to extend the statewide agency coordination calls by inviting all Santa Clara County agencies. A meeting invite for the 6/18/19 call was sent out.)

We shared with the group Valley Water's experience in participating on these calls, including the benefits of learning what CFPW is about, ways to participate, and resources for events. We discussed how Valley Water's Education Outreach (EO) Program presented flood awareness programming in classrooms throughout the county from October 2017 to March 2018. The effort reached over 4,000 students in 176 classrooms, from 39 schools. The schools were located in 7 cities throughout the county; Campbell, Cupertino, Milpitas, San Jose, Morgan Hill, Santa Clara, and Saratoga, and were schools that had requested visits from EO for the 2017-18 school year.

All students were invited to enter Valley Water's "Are You Flood Ready?" flood awareness coloring contest. Over 350 entries were received from 16 different schools. Winning entries were selected to represent each of Valley Water's seven board members' districts and prizes were awarded. The winning students received an emergency hand-crank radio, plus an emergency starter kit and a copy of "Chicken Little's Flood Advice" (a book about a character that is always prepared for any emergency). Emergency starter kits, "Chicken Little's Flood Advice" books and a copy of the Red Cross Emergency Contact Card were given to all students in the winning student's classes. The teacher in the winning students' classrooms received a back-pack full of emergency supplies to keep in the classroom.

The coloring contest entry sheets were then decoupaged into an artwork display that was exhibited in Valley Water's headquarters lobby starting during the 2018 CFPW October 20-26, 2018 and running through the end of the flood season in April 2019.

At the May 29th meeting, Valley Water Office of Emergency Services shared information on our next scheduled Winter Preparedness Workshop, to be held on October 31, 2019. We also informed the meeting participants that this workshop qualifies for the Certified Floodplain Managers (CFMs) continuing education credits.

The City of Mountain View discussed the importance of emergency response coordination between CRS communities and their Office of Emergency Services. As was pointed out at the February 2019 meeting, activities like the County's LHMP (*credited under Activity 510 – Floodplain Management Planning*) yield CRS points. Understanding the nexus between CRS and the people who perform activities for which the communities receive CRS credit is important. Maintaining open dialogue with staff is central in ensuring CRS requirements are being met and/or maintained. Valley Water also discussed our LHMP versus the County's LHMP; we shared that we would be presenting Valley Water's LHMP as part of our upcoming August 2019 audit submittal.

The consensus is that our PPI implementation is on target and that no changes are needed. Cities who have had the PPI approved by their elected officials reported receiving strong support. For cities that had not gotten the PPI approved yet, the major problem is still workload related. The Public Works Departments in our area continue to have a great deal of work due to the high development level with Silicon Valley's current economic boom.

The PPI Annual Evaluation Report needs to be shared with each participating community's governing body. Table 2 is a chart of how each community expects to communicate the report.

	Community	Method for Sharing
1	Santa Clara Valley Water District	Board Non-Agenda Item
2	City of Cupertino	TBD
3	City of Gilroy	Consent Calendar
4	City of Los Altos	City Manager's Weekly Update
5	City of Milpitas	Memo to City Council
6	City of Morgan Hill	Council Consent Calendar
7	City of Mountain View	Council Weekly Update
8	City of Palo Alto	Informational Staff Report
9	City of San Jose	City Manager's Weekly Report
10	City of Santa Clara	Council Consent Calendar
11	City of Sunnyvale	City Manager's "Update Sunnyvale"
12	County of Santa Clara	TBD

Table 2. How PPI Annual Evaluation Report will be shared with Community's Governing Body

V. FUTURE MESSAGING

The messages that we originally chose are still relevant to Santa Clara County. We will continue to increase our efforts to encourage people to prepare t personal/family emergency plans and be flood-ready. This will be incorporated into the flood preparedness outreach that is done every fall. We will also coordinate efforts with the Valley Water's Education Outreach Program to continue promote flood preparedness in local schools with an emphasis on reaching students and families that were affected by the February 2017 floods and those in other flood zones throughout the county.

The PPI Committee further recommends we continue to increase the use of social media for messaging. People are increasingly using their phones to get information, so the more we can use banner ads, sponsored articles, etc., the better. The PPI Committee was pleased to see all the outreach in different media that Valley Water had done in prior years. The meeting attendees shared that they had seen various messages throughout the season on different media.

In support of our preparedness messaging, we will continue to promote the importance of having family emergency plans and emergency kits ready to go <u>before</u> an emergency event occurs. Emergency preparedness starter kits of emergency supplies have been distributed countywide as a give-away at various emergency preparedness fairs or events. To qualify for an emergency preparedness starter kit, each person will be asked to download an emergency alert App onto their cell phones. We will continue to promote the County's ReadySCC App, as well as the American Red Cross Flood App. For people who do not have cell phones, they will be asked to demonstrate that they started to complete an American Red Cross Emergency Contact Card that was given to them.

<u>Targeted Outreach</u>: In FY20, the Education Outreach Program will distribute 750 emergency preparedness starter kits to educators throughout Santa Clara County. This action will serve as a continuation of our flood awareness education messaging.

Targeted student outreach will include distribution of the US Army COE "I am Flood Ready" flood preparedness activity book, as available, to the classrooms of the 750 above-mentioned educators.

The education curriculum will include grade-level appropriate flood preparedness activities and messaging.

VI. CONCLUSION

Overall, the CRS Users Group was successful in implementing the PPI in FY19. The PPI allowed participating communities to mutually decide which flood risk reduction messages are most appropriate and identified how those messages are delivered. The objectives of participating in the PPI are to enhance the effectiveness of the flood risk messages to residents, reduce flood risks within the county, and earn valuable CRS credit points when identified projects are implemented by communities. The CRS Users Group and the PPI will continue through FY20.

Attachments for submission to Valley Water Board, City Councils/Managers, and FEMA as part of 2019 Verification/Recertification Package, as required:

		The flood awareness paid advertisement campaign ran over a 5-month
		period from mid-November 2018 to mid-April 2019. The total cost of the paid advertisement campaign was \$201,355. The paid media campaign
		served a total of 34,808,684 impressions, up from impressions in 2018 at
		21,815,542
		Valley Water's annual Floodplain Mailer (FPM) is sent to all SC County
		parcels in the FEMA flood zone. In FY19, the FMP was mailed out to 52,064
		addresses between November 19 - 21, 2018 and to all Santa Clara County
		city/county Public Works and Planning Departments on December 14, 2018. The FPM is posted on our website.
		Valley Water's annual November 2018 Countywide Mailer (CWM) was sent
		between December 26-27, 2018 countywide to 729,929 addresses (USPS: ECRWSS -Extended/Enhanced Carrier Route Walking Sequence Saturation
		Postal Customer). The CWM includes flood protection and preparedness
		measures information, including FEMA map reading services, getting flood
		insurance, family emergency plans, downloading emergency preparedness
		app "Ready SCC," and where to get sandbags.
		Valley Water's 2017-2018 Annual Report/2019 Calendar includes
		information regarding on-going efforts to protect people, homes, and business from flooding and protecting the environment throughout the
		county. This report was made available to the public through an online
		request form and was mailed out during the months of December 2018
		and January 2019.
		Los Altos: Outreach materials are displayed at Los Altos City Hall front
		, counter and Los Altos library. An article titled "Flood Insurance Information
		Available" was published four times in the Los Altos Town Crier.
		Milpitas: In February and June 2019, city mailed out "2018-2019 Public
		Advisory" informational SFHA brochure which includes flood preparedness
		messaging to all addresses in the city. The city's annual newsletter "Connected" is mailed out citywide, which includes information on "Know
		Your Flood Risk", May - July 2018 Volume V.
		http://www.ci.milpitas.ca.gov/_pdfs/newsletter-may-july2018.pdf
		Morgan Hill: The city's citywide flood newsletter and city's weekly
		newsletter/e-mail blast (called Weekly 411) sent out to subscribers during
		the months of September 2018, December 2018, January 2019, and February 2019 included messages about flood safety and emergency
		preparedness.
		Palo Alto: The city's utility bill inserts include this message.
		Santa Clara: The city's citywide "Inside Santa Clara" newsletter includes
		these messages and is sent to all addresses in city in fall each year.

Community At Large (CAL) The PPI Committee recognized that the entire community that lives and/or works in Santa Clara County Is subject to impacts due to flooding. The CRS typically focuses on residential flooding, but here, flooding of businesses and roads is also very important.	Topics 1, 2, 3, 4, 5, 6, 7, 8, 8, 9 Message: Know your flood risk and be prepared; buy flood insurance	Educate our community on flood protection and preparedness measures Increase in This' on Valley Water and citles Flood Protection Resources pages and improve Valley Water's Flood Awareness Campaign results	CAL OP #47. Flood Awareness Campaign, including radio and bus ads. For this year, we are preparing to have radio ads ready to place, but we'll only place them if/when there are major storm systems in the forecast	Valley Water Communications Cities Communications	October-April	FEMA Radio Stations Valley Transportation Authority American Red Cross	All	Valley Water: The theme for the 2018-19 flood awareness campaign was "Cilmate Changed." It isunched shortly after the Fourth National Climate Assessment was published. The federal report assessed intense extreme weather and dimate-related events are becoming more frequent and will have catastrophic impacts on vulnerable communities, infrastructure, ecosystems and our economy. Extreme storm events could result in more frequent and severe flooding in our region. Valley Water's message emphasized our commitment to reducing flood risks and protecting the community but acknowledging we cannot eliminate all risks. Thus, we must adapt and we must prepare. And it starts with being informed and aware of risks. Community outreach efforts were supplemented by an educational paid advertising campaign. This year, our advertising campaign was supplemented by a series of formative research to truly understand our target audience, its level of awareness, and explore what educational messages and images most appealed to the group. The overall campaign cost was approximately \$335,000 which included creative and production costs, a media buy of \$200,000, the floodplain mailer production and distribution costs of \$32,000 and a post-campaign survey. The flood awareness paid advertisement campaign ran over a 5-month period from mid-November 2018 to mid-April 2019. The total cost of the paid advertisement campaign was \$201,355. The paid media campaign served a total of 34,803,684 impressions, up from impressions in 2018 at 21,815,542.

Agenda

Santa Clara County CRS Users Group Wednesday, May 29, 2019 | 2:00 PM – 4:00 PM Santa Clara Valley Water District | Administration Building | Conference Room B-108 5750 Almaden Expressway, San Jose, CA 95118

Directions: https://www.valleywater.org/directions-santa-clara-valley-water-district-offices

Purpose: PPI Stakeholder Committee Annual Evaluation Meeting per Activity 330, Outreach Project, Element 332.c. Program for Public Information, Step 7 requirement (see below-noted Excerpt)

<u>Desired Outcome</u>: Gather communities' input on how the PPI worked over the past year; plan and choose / confirm PPI messages

1.	Introductions (be sure to complete the sign-in sheet to document communities' required participation) (All) a. Interested Parties
2.	 Emergency Response Coordination Activity 510 – Floodplain Management Planning a. County Office of Emergency Services – Local Hazard Mitigation Plan b. Valley Water Local Hazard Mitigation Plan
	(Jacqueline Solomon, City of Mountain View)
3.	Annual Evaluation Report for FY19 (Year 4) (All) a. Using Annual Evaluation FY18 (Year 3), Appendix A Table, to populate FY19 data (All) b. Communities to complete Appendix A Worksheet Finalized document presented to governing bodies will be requested as part of annual recertification due 8/1/19
4.	Adjourn

For questions, please contact Merna Leal at (408) 630-2610 or <u>mleal@valleywater.org</u> Teleconference Access Code: # 1-877-336-1831 | Participant Code: 1615094#

Next Meeting:

Mark Your Calendars - TBD | Early 2020

<u>Purpose:</u> Discuss PPI Annual Evaluation Report for FY20 (Year 5), which must be completed before August 1, 2020 (*annual recertification due date*) and begin to review/discuss update due of the Santa Clara County Multi-Jurisdictional Program for Public Information 2015 (*see below-noted Excerpt*)

Excerpt from 2017 CRS Coordinator's Manual:

"Step 7: Implement, monitor, and evaluate the program. The Program for Public Information committee meets at least annually to monitor the implementation of the outreach projects. The committee assesses whether the desired outcomes were achieved and what, if anything, should be changed. <u>This work is described in an evaluation report that is prepared each year, sent to the governing body, and included in the annual recertification</u>.

The community <u>must update</u> its Program for Public Information <u>at least every five years</u>. This can be a new document or an addendum to the existing document that updates the needs assessment and all sections that should be changed based on evaluations of the projects.

The Program for Public Information update will be reviewed for CRS credit according to the *Coordinator's Manual* currently in effect, not the version used when the community originally requested this credit. The update can qualify as the annual evaluation report for the year it was prepared. The updated Program for Public Information must be adopted following the same process as adoption of the original document."
