Subject: Approval of an Agreement for the Performance of Services with Quality Assurance Engineering, Inc. dba Consolidated Engineering Laboratories for Inspection and Materials Testing Services for Various Electric Substation Projects

EXECUTIVE SUMMARY

The City of Santa Clara's Electric Department, Silicon Valley Power (SVP), is undertaking a significant capital construction program for electric transmission, substation and distribution facilities over the next several years. This work is necessary to meet customer demands for increased electric load while maintaining SVP's high service.

The City's Building Inspection Division requires materials testing and special construction inspections during certain stages of construction. In response to the increased construction need to meet customer requests, SVP sought supplemental assistance and issued an RFP for Material Testing and Special Construction Inspections associated with civil construction. SVP received five (5) proposals outlining each firm's qualifications and experience. The proposals were reviewed against a comprehensive scorecard evaluating each specific area of the RFP. Each proposal was ranked on the firm's demonstrated ability to successfully perform the work as outlined in the RFP. Quality Assurance Engineering, Inc. dba Consolidated Engineering Laboratories (CEL) was scored as the firm that best met the requirements based on the RFP's criteria.

Staff recommends that an Agreement for the Performance of Services be executed with Quality Assurance Engineering, Inc. dba Consolidated Engineering Laboratories (CEL) for on-call material testing and inspection services pertaining to substation, transmission and distribution facilities over the next three years. A copy of the Agreement for the Performance of Services with Quality Assurance Engineering, Inc. dba Consolidated Engineering Laboratories can be viewed on the City's website and is available in the City Clerk's Office for review during normal business hours.

ADVANTAGES AND DISADVANTAGES OF ISSUE

Utilizing a qualified testing and inspection firm such as CEL will provide for efficiencies and consistency to meet the special construction inspection requirements of the Building Inspection Division. No disadvantages were identified with this issue.
