At one of the December meetings, the City Attorney claimed campaign spending on behalf of a city councilmember created a "common law conflict of interest" that required councilmembers to recuse themselves from any discussions related to that issue. Contracts with the police and fire unions are on the agenda today. Lisa Gillmor and Kathy Watanabe benefited from campaign spending by these unions. Doyle must provide the same advice he did in December or admit that his advice in December was wrong.

Stopping AAPI hate is not only merely condemning violence, bigotry, and xenophobia but also the acts of exclusion towards this community that lead to marginalization. Silencing Councilmember Park silenced the voices of AAPI community members and their trusted leaders. We call for this Council to censure the actions of Councilmember Watanabe and request that she issue a public apology to Councilmember Park and the AAPI community. Such acts of institutional racism must not be tolerated.

My name is Kayla Williams speaking on behalf of Community Health Partnership, an association of community clinics in Santa Clara and San Mateo County. We are angered by the acts of violence against the Asian American Pacific Islander community locally and nationally. We are appalled that Councilmember Kevin Park, the only Korean American member of this council, was blocked by Councilmember Kathy Watanabe from speaking at the Stop AAPI Hate event on March 31st.

I read the news about what happened at the recent rally in Santa Clara

The rally underscored more than ever the need for AAPI voices to be uplifted and centered in a time when they are being silenced and suppressed.

It proves what AAPI leaders have been saying for years, that when we try to speak up, we are repeatedly marginalized, as others attempt to "put us in our place". One does not get to claim AAPI allyship while they are silencing AAPI voices.

Longterm homeowners want stability in return for 30 year mortgages while developers want as much cash as they can acquire and City Councils want expanding tax bases. These things do not go together. Might I suggest a regional Housing Trust Fund, based on the wildly successful Open Space Trust Fund organizations? And, frankly, finding spots for creating great high density multi-income communities that will not cause later environmental headaches may put them away from currently targeted locales.

As a former air traffic control software engineer & manager I want to draw attention to the fact that, if stoplight or stop sign infrastructure can differentiate bikes from cars, future automation can extend to bikes as well as cars. For example, an addition to a bike can alert a bicyclist that he or she must start braking so as to properly stop in appropriate places & this can decrease accidents where bikes are at-fault. Of course there is a low tech solution: completely Isolate bikes & cars.
