REPORT TO COMMISSION

SUBJECT

Introduction of Sustainability Manager for the City of Santa Clara.

BACKGROUND

Sustainability pervades all aspects of development in a city, from the type, location, and intensity of land uses to actual materials for building and landscaping. All of these components have a direct effect on the local and regional environment. By implementing sustainable measures and policies, Santa Clara can reduce its contribution to global climate change, minimize reliance on oil and other fossil-fuels and decrease consumption of natural resources.

Santa Clara has been a leader in sustainable development for more than 40 years, and the City's residents want to see these efforts continue as the City moves forward. The City has collaborated on regional efforts to reduce greenhouse gas emissions, to conserve water and energy resources, to recycle both waste and wastewater, and to expand transit-oriented and sustainable development opportunities.

DISCUSSION

Michelle Templeton, Sustainability Manager for the City of Santa Clara will discuss her new role, and the Sustainability Program for the City.
