### **Points for consideration**

- The project includes the construction of a 486 square foot first floor addition in the rear and a new 426 square feet master suite addition to the existing second floor.
- The second story addition has a 3'8" setback from the east side of the first-floor wall and 10 feet setback from the rear of the first-floor wall. These setbacks are consistent with the design guideline to reduce flush and plain wall effect with a two-story residence.
- The new second-story window on the east side is a clerestory window that would maintain privacy for the immediate neighbor to the east.
- The project would also include a new dining room, kitchen, and living room.
- The exterior of the addition would be finished with new stucco and paint to match existing.
- Roof form with a 5:12 pitch and composition shingle material would match existing.
- 300-foot neighborhood notice was distributed for this project review.
- There are no active code enforcement cases for this property.
